| Learning outcomes | Course out | Subject outcome | | | Method of verification | | | | |
| | [K6_U07] can apply methods of process and function support, specific to the field of study | | Student configures audio and video recording equipment depending on the needs. | | | [SU1] Assessment of task fulfilment [SU4] Assessment of ability to use methods and tools | | | |
| | [K6_U05] can plan and conduct experiments related to the field of study, including computer simulations and measurements; interpret obtained results and draw conclusions | | Student prepares a studio for sound and / or video recordings. | | | [SU1] Assessment of task fulfilment [SU4] Assessment of ability to use methods and tools | | | |
| | [K6_W05] Knows and understands, to an advanced extent, methods of supporting processes and functions, specific to the field of study | | The student uses computer tools for editing sound and movie. | | | [SW1] Assessment of factual knowledge | | | |
| | [K6_W03] Knows and understands, to an advanced extent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum | | The student chooses the type of studio equipment for voice recordings. The student chooses the type of video equipment for video recording. | | | [SW1] Assessment of factual knowledge | | | |
| | [K6_W35] Knows the concepts of the technique of signal transmission, operation of telecommunications networks and multimedia services and the rules for providing them | | Student chooses the type of studio devices interface depending on the needs. | | | [SW1] Assessment of factual knowledge | | | |
