

Subject card

Subject name and code	Instrumental methods of studying the structure and activity of biomolecules, PG_00053351						
Field of study	Biomedical Engineering, Biomedical Engineering, Biomedical Engineering						
Date of commencement of studies	February 2022	Academic year of realisation of subject	2022/2023				
Education level	second-cycle studies	Subject group	Optional subject group Subject group related to scientific research in the field of study				
Mode of study	Full-time studies	Mode of delivery	at the university				
Year of study	2	Language of instruction	Polish				
Semester of study	3	ECTS credits	2.0				
Learning profile	general academic profile	Assessment form	assessment				
Conducting unit	Department of Pharmaceutical Technology and Biochemistry -> Faculty of Chemistry						
Name and surname of lecturer (lecturers)	Subject supervisor	prof. dr hab. inż. Sławomir Milewski					
	Teachers	prof. dr hab. inż. Sławomir Milewski dr inż. Andrzej Skwarecki dr hab. inż. Piotr Bruździak dr inż. Kamila Rząd dr hab. inż. Rafał Piątek dr inż. Weronika Hewelt-Belka					
Lesson type and method of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	30.0	0.0	0.0	30
	E-learning hours included: 0.0						
	Additional information: Indoor laboratory excercises						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	30	2.0	18.0	50		
Subject objectives	Making students familiar with practical aspects of modern instrumental methods application in studies on biomolecules						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K7_W02] Knows and understands, to an increased extent, selected laws of physics and physical phenomena, as well as methods and theories explaining the complex relationships between them, constituting advanced general knowledge in the field of technical sciences related to the field of study	Student is able to draw conclusions concerning structures of biomolecules based on the results of instrumental analysis	[SW3] Assessment of knowledge contained in written work and projects
	[K7_W53] Knows and understands, to an increased extent, selected aspects of biomedical diagnostics.	Student knows the possibilities of application of chromatographic techniques for purification of biomacromolecules. Student knows the rules of choice of spectroscopic methods for examination of structure and activity of biomolecules and is able to use them in practice.	[SW3] Assessment of knowledge contained in written work and projects
	K7_K02	Student is able to prepare the schedule of task execution, execute this task as a group member, evaluate the results obtained and discuss them.	[SK5] Assessment of ability to solve problems that arise in practice [SK3] Assessment of ability to organize work
[K7_U53] can apply advanced equipment used in biomedical diagnostics	Student is able to determine conditions of protein purification by FPLC. Student knows the basic rules of running the microcalorimetric experiments, spectrophotometric measurements and by MS and NR spectroscopy	[SU4] Assessment of ability to use methods and tools	
Subject contents	<ol style="list-style-type: none"> 1. Analysis of kinetics of protein denaturation by means of differential scanning calorimetry 2. Use of FPLC for isolation and characterisation of biomacromolecules 3. Application of HPLC for isolation of substances of natural origin and examination of antibiotics purity 4. Determination of protein molecular mass by MS-ESI 5. FTIR spectroscopy in examination of protein secondary structure 6. Determination of structure and activity of biomolecules by NMR 7. Examination of biological membranes and transmembrane transport by spectrofluorimetry 8. Spectrofluorimetric determination of kinetic parameters of protein:ligand interaction 9. Differential UV/vis spectroscopy in DNA:ligand interaction studies 10. Application of surface plasmon resonance in biological studies 		
Prerequisites and co-requisites	Knowledge of Biochemistry at the 1st level studies		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Assessment of theory knowledge	50.0%	30.0%
	Report	50.0%	50.0%
	Practical exercises	100.0%	20.0%

Recommended reading	Basic literature	Materials available at the departmental WWW page "Instrumentalne metody badania struktury i aktywności biomolekuł", S. Milewski (red), Wydawnictwo PG 2013
	Supplementary literature	Alan Cooper, Chemia biofizyczna, PWN W-wa, 2010
	eResources addresses	
Example issues/ example questions/ tasks being completed	<ol style="list-style-type: none"> 1. List the ionisation techniques used in mass spectrometry 2. What absorption bands in UV region are characteristic for proteins? 3. Which features of medium-pressure liquid chromatography (FPLC) are crucial for the usefulness of this technique for biomolecules separation? 	
Work placement	Not applicable
