

Subject card

Subject name and code	Electronic Systems Programming, PG_00047493						
Field of study	Electronics and Telecommunications						
Date of commencement of studies	February 2022		Academic year of realisation of subject		2022/2023		
Education level	second-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		English		
Semester of study	2		ECTS credits		1.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Metrology and Optoelectronics -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Arkadiusz Szewczyk				
	Teachers		dr inż. Arkadiusz Szewczyk				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	15.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		2.0		8.0	25
Subject objectives	Practicing of skills of realization electronic systems comprising of electronic circuit and controlling software with appropriate interface.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_U04] can apply knowledge of programming methods and techniques as well as select and apply appropriate programming methods and tools in computer software development or programming devices or controllers using microprocessors or programmable elements or systems specific to the field of study, making assessment and critical analysis of the prepared software as well as a synthesis and creative interpretation of information presented with it		is able to use his knowledge of programming methods and techniques, and select and apply appropriate programming methods and tools in creating software for computer controlled device or system		[SU4] Assessment of ability to use methods and tools		
	[K7_U03] can design, according to required specifications, and make a complex device, facility, system or carry out a process, specific to the field of study, using suitable methods, techniques, tools and materials, following engineering standards and norms, applying technologies specific to the field of study and experience gained in the professional engineering environment		is able to design, in accordance with the given specification, and build a computer controlled device or system using appropriately selected methods, techniques, tools and materials		[SU1] Assessment of task fulfilment		
Subject contents	1. Introduction to the subject 2. Presentation of projects 3. Project design and testing						
Prerequisites and co-requisites	Base knowledge of electronic metrology						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	Project report		50.0%		100.0%		

Recommended reading	Basic literature	Wiesław Tłaczała, "Środowisko LabVIEW w eksperymencie wspomaganym projektowo", WNT 2002 Marcin Chruściel, "LabVIEW w praktyce", BTC 2008
	Supplementary literature	No requirements
	eResources addresses	
Example issues/ example questions/ tasks being completed		
Work placement	Not applicable
