

Subject card

Subject name and code	Information Systems Security, PG_00055353						
Field of study	Electronics and Telecommunications						
Date of commencement of studies	February 2022	Academic year of realisation of subject			2022/2023		
Education level	second-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Teleinformation Networks -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Bartosz Czaplewski					
	Teachers	dr inż. Bartosz Czaplewski					
Lesson type and method of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	15.0	0.0	0.0	45
	E-learning hours included: 0.0						
Information Systems Security 2023 - Moodle ID: 24280 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=24280							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		3.0		27.0	75
Subject objectives	Knowledge of information security threats and methods of information protection against these threats.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K7_W06] Knows and understands, to an increased extent, the basic processes taking place in the life cycle of devices, facilities and technical systems.	Student identifies, classifies and recognizes threats of information security during data transmission and basic cryptographic systems. Student identifies and classifies security services and mechanisms. Student analyses encryption and decryption processes as well as estimates cryptographic system resistance to malicious attacks.	[SW1] Assessment of factual knowledge
	[K7_U06] can analyse the operation of components, circuits and systems related to the field of study; measure their parameters; examine technical specifications; interpret obtained results and draw conclusions	Student identifies, classifies and recognizes threats of information security during data transmission and basic cryptographic systems. Student analyses encryption and decryption processes as well as estimates cryptographic system resistance to malicious attacks.	[SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools
	[K7_W08] Knows and understands, to an increased extent, the fundamental dilemmas of modern civilisation, the main development trends of scientific disciplines relevant to the field of education.	Student identifies, classifies and recognizes threats of information security during data transmission and basic cryptographic systems. Student identifies and classifies security services and mechanisms. Student analyses encryption and decryption processes as well as estimates cryptographic system resistance to malicious attacks.	[SW1] Assessment of factual knowledge
	[K7_W03] Knows and understands, to an increased extent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum.	Student identifies, classifies and recognizes threats of information security during data transmission and basic cryptographic systems. Student identifies and classifies security services and mechanisms. Student analyses encryption and decryption processes as well as estimates cryptographic system resistance to malicious attacks.	[SW1] Assessment of factual knowledge
	[K7_U07] can apply advanced methods of process and function support, specific to the field of study	Student identifies, classifies and recognizes threats of information security during data transmission and basic cryptographic systems. Student analyses encryption and decryption processes as well as estimates cryptographic system resistance to malicious attacks.	[SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools

Subject contents	<ol style="list-style-type: none"> 1. Information system security 2. Basic information security aspects 3. Network security model 4. Basic aspects of cryptographic systems 5. Cryptanalysis methods 6. Classic ciphers 7. Introduction to block ciphers 8. Data Encryption Standard (DES) 9. Design principles for block ciphers 10. Block cipher modes 11. Double and triple encryption (3DES) 12. International Data Encryption Algorithm (IDEA) 13. Advanced Encryption Standard (AES) 14. Link encryption and end-to-end encryption 15. Key distribution methods 16. Generating pseudo-random numbers 17. RC4 stream cipher 18. Asymmetric cryptographic systems 19. RSA system 20. Distribution of public keys 21. Diffie-Hellman algorithm 22. ElGamal algorithm 23. Elliptic-curve cryptography 24. The future of asymmetric cryptography 25. Asymmetric cryptography resistant to attacks of quantum computers 26. Message authentication 27. One-way hash functions 28. Rainbow tables 29. Digital Signature properties 30. Digital Signature Algorithm (DSA) 31. The basics of steganography 32. Digital fingerprinting 33. Reversible Data Hiding 											
Prerequisites and co-requisites												
Assessment methods and criteria	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 33%;">Subject passing criteria</th> <th style="width: 33%;">Passing threshold</th> <th style="width: 34%;">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td>Lecture</td> <td>50.0%</td> <td>60.0%</td> </tr> <tr> <td>Laboratory</td> <td>50.0%</td> <td>40.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Lecture	50.0%	60.0%	Laboratory	50.0%	40.0%
Subject passing criteria	Passing threshold	Percentage of the final grade										
Lecture	50.0%	60.0%										
Laboratory	50.0%	40.0%
