

## Subject card

Subject name and code	Metrology and Measurement Systems, PG_00055375								
Field of study	Mechanical Engineering								
Date of commencement of studies	October 2021		Academic year of realisation of subject			2021/2022			
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	1		Language of instruction			Polish			
Semester of study	2		ECTS credits			6.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Department of Manufacturing and Production Engineering -> Faculty of Mechanical Engineering and Ship Technology						ng and Ship		
Name and surname of lecturer (lecturers)	Subject supervisor dr inż. Michał Dobrzyński								
	Teachers		mgr inż. Karolina Miętka						
			dr inż. Michał Dobrzyński						
			mgr inż. Anna Janeczek						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	:t	Seminar	SUM	
	Number of study hours	30.0	15.0	30.0	0.0		0.0	75	
	E-learning hours included: 0.0								
	Adresy na platformie eNauczanie:  Metrologia i systemy pomiarowe , W/L/C, MiBM, sem. 02, letni 21/22 (PG_00055375) - Moodle ID: 23644 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=23644								
Learning activity and number of study hours	Learning activity	Participation in classes included	n didactic	Participation in consultation hours		Self-study		SUM	
	Number of study hours	75		6.0		69.0		150	
Subject objectives	Recognition with the basic principles of metrology and preparing to conduct measurements of mechanicalsizes with the analysis of the results. Rules for determining the accuracy, tolerate and fits of machine parts. Knowledge of the methods of measurement and measuring instruments.								
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	[K6_U10] is able to formulate the principles of selecting a material for a construction, ensuring the correct operation of a device		Student explains construction and principle of operation of measurement instruments. Student chooses suitable measuring instrument for measure given quantity. Student measures. Student analyses results of measurements. Student calculates measuring errors			[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to present the results of task			
	[K6_W11] possesses knowledge on design, technology and manufacturing of machine parts, metrology, and quality control; knows and understands methods of measuring and calculating basic values describing the operation of mechanical systems, knows basic calculating methods applied to analyse the results of experiments		Student recognizes mechanical quantities subject to measurement. Determine measurement methods and systems.			[SW1] Assessment of factual knowledge			

Data wydruku: 09.04.2024 06:51 Strona 1 z 2

Subject contents	Basic concepts in metrology: measurement, units of measurement, standards and instruments. Accuracy and uncertainty. The geometrical structure of the product (Geometrical Product Specifications - GPS). Basics of tolerances, deviations and fits. Geometric tolerances. General Tolerances - Tolerances for linear and angular dimensions without individual tolerance indications. Fundamentals of measurements (repeatability and reproducibility of a measuring device). Surface texture. Metrological methods and equipment and principles of its selection.Laboratory: Measurements of external, internal, mixed and intermediate dimensions. Measurement of angles, cones,. Measurements of surface texture and contours. Measurements with the use of altimeters. 2D measurements. Coordinate measuring technique (manual and CNC measuring machines).Tutorials: Measurements and their uncertainty (Measurement errors, uncertainty, uncertainty budget and statistical analysis of measurement results). Tolerances and fits. Dimensional chains. Tolerance of component dimensions, interchangeability. Thread tolerance.					
Prerequisites and co-requisites	Basic knowledge of technical drawing					
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade			
and criteria	Laboratory	60.0%	30.0%			
	Lecture	60.0%	50.0%			
	Tutorial	60.0%	20.0%
