

Subject card

Subject name and code	Internal Combustion Engines, PG_00055520						
Field of study	Mechanical Engineering						
Date of commencement of studies	October 2021	Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	6	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Institute of Energy -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Jacek Kropiwnicki					
	Teachers	dr inż. Sławomir Makowski dr hab. inż. Zbigniew Kneba dr hab. inż. Jacek Kropiwnicki					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	15.0	15.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	60	4.0		36.0	100	
Subject objectives	Presentation of the modern achievements and tendencies in the area of internal combustion engines, classification, as well as an indication of the possible application nowadays and in the future, with particular emphasis on Polish conditions.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_U06] is able to use mathematical and physical models for analysing the processes and phenomena occurring in mechanical devices within the range of material strength, thermodynamics and fluid mechanics	Student designs reciprocating machine, projects components, makes thermal and resistance calculations.			[SU1] Assessment of task fulfilment		
	[K6_U07] is able to design a typical construction of a mechanical device, component or a testing station using appropriate methods and tools, adhering to the set usage criteria	Can use modern tools and knowledge in designing, operating and components selecting.			[SU1] Assessment of task fulfilment		
	[K6_W08] possesses basic knowledge including the methodology of designing machine parts, mechanical devices, selection of construction materials, manufacturing and operation, with the lifetime cycle	Can analyse and evaluate the methods of functioning of the internal combustion engines, understands the specificity of propulsion systems, understands the consequences of the selected solutions in terms of achieved energetics parameters of the system.			[SW1] Assessment of factual knowledge		

Subject contents	<p>Lecture: Internal combustion engines. General information about internal combustion engines, their structure and properties, characteristics, modelling of the work cycle, mechanical and thermal loads, mechanics of the crank system, balancing, calculation and design of the flywheel, analysis of the structure of the main components of internal combustion engines, strength calculations, bearings of internal combustion engines, fuels, fuel and ignition systems, solutions for energy systems, biogas plants, land vehicles, working machines and watercrafts, hybrid vehicle drive systems, electronic diagnostics of engines.</p> <p>Tutorials: Work cycle modelling, device initial calculations, crank system mechanics, strength calculations, energy analysis, calculations of drive systems.</p> <p>Laboratory: Construction and identification of internal combustion engine components, measurements of the basic parameters of internal combustion engines, testing of power supply components and electronic diagnostics of CI engines, supply, ignition systems and electronic diagnostics of IG engines, start-up and shutdown of the Stirling engine, displacement compressor drive.</p>														
Prerequisites and co-requisites															
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="454 600 794 629">Subject passing criteria</th> <th data-bbox="799 600 1139 629">Passing threshold</th> <th data-bbox="1144 600 1482 629">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="454 636 794 665">Test (tutorials)</td> <td data-bbox="799 636 1139 665">50.0%</td> <td data-bbox="1144 636 1482 665">30.0%</td> </tr> <tr> <td data-bbox="454 672 794 701">Laboratory reports</td> <td data-bbox="799 672 1139 701">90.0%</td> <td data-bbox="1144 672 1482 701">10.0%</td> </tr> <tr> <td data-bbox="454 707 794 736">Test (lecture)</td> <td data-bbox="799 707 1139 736">50.0%</td> <td data-bbox="1144 707 1482 736">60.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Test (tutorials)	50.0%	30.0%	Laboratory reports	90.0%	10.0%	Test (lecture)	50.0%	60.0%
Subject passing criteria	Passing threshold	Percentage of the final grade													
Test (tutorials)	50.0%	30.0%													
Laboratory reports	90.0%	10.0%													
Test (lecture)	50.0%	60.0%
