

Subject card

Subject name and code	Descriptive geometry, PG_00055590						
Field of study	Architecture						
Date of commencement of studies	October 2021		Academic year of realisation of subject		2021/2022		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	1		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Visual Techniques -> Faculty of Architecture						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. arch. Anna Wanclaw				
	Teachers		mgr inż. arch. Michał Malewczyk mgr inż. arch. Dariusz Cyparski				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	15.0	0.0	45
	E-learning hours included: 0.0						
	Adresy na platformie eNauczanie: Descriptive Geometry I, 2021/22 - Moodle ID: 16419 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=16419						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		8.0		47.0	100
Subject objectives	Development of the ability of spatial manipulation in two dimensional drawing. Acquiring skills in using axonometric drawing.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U04] is able to use analytical methods to formulate and solve project tasks		He can use various methods of space mapping to solve simple spatial problems. He can present the effects of work in an attractive way. Has manual skills in the precise execution of linear drawings.		[SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to present the results of task		
	[K6_W01] knows and understands construction problems, building and engineering issues related to building design; principles, solutions, constructions and building materials used in simple engineering tasks in the field of architectural and urban design		He knows various methods of mapping space. Correctly constructs and reads spatial objects in various types of projections, also with the use of popular digital programs.		[SW1] Assessment of factual knowledge		

Subject contents

Descriptive Geometry, lecture:

1. Introduction, elements of the space, projection, Monge projections
2. Projection of point, line and plane
3. Common elements, shadows
4. Parallelism, perpendicularity, transformation
5. Construction of polyhedrons,
6. Sections of polyhedrons, compounds of collineation
7. Revolution, developments of polyhedrons
8. Piercing points, intersection of polyhedrons
9. Orthogonal axonometric projection
10. Oblique axonometric projection
11. Geometry of roofs
12. Spatial model of the roof, digital visualization
13. Horizontal projection
14. Horizontal projection, engineering application
15. The road in the terrain

Descriptive Geometry, project:

1. Introduction, elements of the space, projection, Monge projections
2. Projection of point, line and plane, transformation
3. Affiliation of elements
- 4, 5. Common elements, shadows
6. Construction of polyhedrons,
7. Sections of polyhedrons, compounds of collineation
8. Revolution, developments of polyhedrons, piercing points,
9. Intersection of polyhedron with line

	10. Test 1. Common elements, shadows. Polyhedrons 11, 12. Orthogonal axonometric projection, intersection of polyhedrons 13, 14. Oblique axonometric projection, shadows 15. Test 2. Axonometry		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Quality of drawings from Descriptive Geometry	100.0%	50.0%
	Aquiring minimum points form Descriptive Geometry reviews	51.0%	50.0%
Recommended reading	Basic literature	Górska Renata, <i>Descriptive geometry. Freshman Level Course Addressed to the Engineering Students</i> Wyd. Polit. Krakowskiej 2013	
	Supplementary literature	Błach A., <i>Inżynierska geometria wykreślna</i> , Gliwice 2002 Grochowski B., <i>Geometria wykreślna z perspektywą stosowaną</i> , PWN 2018 Otto F.E., <i>Geometria wykreślna</i> , PWN 1977	
	eResources addresses	Descriptive Geometry I, 2021/22 - Moodle ID: 16419 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=16419	
	Example issues/ example questions/ tasks being completed	1. Construct shadows of polyherdra and line 2. Construct projections of the polyhedron, based on the data of the axis of symmetry and one of the vertices 3. Construct the line of intersection of two given polyhedra 4. In axonometry defined by axes x, y, z contruct a polyhedron and its own shadow and the shadow cast on the planes of projection	
Work placement	Not applicable
