

Subject card

Subject name and code	Geometry and Engineering Graphics, PG_00055799						
Field of study	Transport and Logistics						
Date of commencement of studies	October 2021	Academic year of realisation of subject			2021/2022		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			8.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Faculty of Ocean Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Wojciech Leśniewski					
	Teachers	dr inż. Jacek Nakielski dr inż. Wojciech Leśniewski dr inż. Agnieszka Maczyszyn dr inż. Jakub Kowalski mgr inż. Tomasz Pająk mgr inż. Dariusz Duda					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	30.0	0.0	30.0	0.0	90
	E-learning hours included: 0.0						
	Adresy na platformie eNauczanie:						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	90	10.0		100.0	200	
Subject objectives	Introduction to Engineering Graphics. The development of spatial imagination. Engineering graphics as a basic tool for transmitting information about machine elements. Ability to draw sketches of drawing elements of machine parts using rectangular and axonometric projections. Understanding the basics of the construction.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_W04] has a basic knowledge in IT, electronics, automation and control, computer graphics useful to understand the possibilities of their application in transport	Ability to use computer software and a freehand drawing to representations and descriptions operation and technology production depicted items.			[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects		
	[K6_U01] can obtain information from literature, databases and other sources, can verify and organize the obtained information, interpret them and form conclusions and justified opinions	Ability to use basic principles and standards to represent the shape and principle operation of devices and parts ships.			[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information [SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to present the results of task		

Subject contents	<ul style="list-style-type: none"> - the role of engineering graphics, basics of standardization, - parallel, rectangular and axonometric projections, - point, line, plane, determination, common points, special locations, - revolving solids and polyhedrons, punching, intersecting, penetrating - views, cases, sections, - dimensioning of elements, tolerating dimensions, marking the condition of the surface, - types of drawings, graphic form of the sheet, rules for the preparation of executive and assembly documentation - getting to know the Autocad / Slidedge software. - basic commands and operations needed to make a 2D detailed and assembly drawing, - construction of 3D models, - construction of simple assemblies in a 3D environment, - creating technical documentation in an electronic version from entrusted axonometric views, - principles of geometrical description of the shape of the hull of ships - theoretical lines - basics of the constructional and technological drawing of the ship's structure 														
Prerequisites and co-requisites	Knowledge of basic machines parts and their construction;														
Assessment methods and criteria	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 40%;">Subject passing criteria</th> <th style="width: 30%;">Passing threshold</th> <th style="width: 30%;">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td>Colloquium including lectures</td> <td>60.0%</td> <td>20.0%</td> </tr> <tr> <td>Drawing exercises</td> <td>60.0%</td> <td>50.0%</td> </tr> <tr> <td>Colloquia of exercises</td> <td>60.0%</td> <td>30.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Colloquium including lectures	60.0%	20.0%	Drawing exercises	60.0%	50.0%	Colloquia of exercises	60.0%	30.0%
Subject passing criteria	Passing threshold	Percentage of the final grade													
Colloquium including lectures	60.0%	20.0%													
Drawing exercises	60.0%	50.0%													
Colloquia of exercises	60.0%	30.0%
