

Subject card

Subject name and code	Fundamentals of IT, PG_00055866						
Field of study	Power Engineering, Power Engineering, Power Engineering						
Date of commencement of studies	October 2021	Academic year of realisation of subject			2021/2022		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	1	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Institute of Manufacturing and Materials Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Krzysztof Doerffer				
	Teachers		dr inż. Piotr Sender dr hab. inż. Maciej Majewski dr inż. Norbert Piotrowski dr inż. Krzysztof Doerffer				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	30.0	0.0	30
	E-learning hours included: 0.0						
	Adresy na platformie eNauczanie: Podstawy informatyki, PG_00055866 - Moodle ID: 18336 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=18336						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		2.0		18.0	50
Subject objectives	Focusing on modern applications of information technology in production systems. Acquiring basic knowledge in the area of using modern IT techniques in the automation and robotization of production systems, in line with the idea of the digital industrial revolution, i.e. industry 4.0.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K6_U04] is able to design a simple device structure and prepare the accompanying technical documentation, conduct a basic technical and economic analysis of energy systems, including technologies using renewable and pro-ecological energy sources as well as conventional and nuclear energy, design energy installations for them and their basic elements (including electric lighting)); select, operate and control the most commonly used electrical devices and drive systems.	The student is able to use the basic IT tools to solve problems related to energy.	[SU1] Assessment of task fulfilment
	[K6_K01] is aware of the need for training and self-improvement in the profession of energy and the possibility of further education; can think and act in a creative and entrepreneurial manner; can define priorities for the implementation of an individual or group task	The student has the ability to work alone as well in the group.	[SK2] Assessment of progress of work
Subject contents	<p>Formal methods of information engineering,</p> <p>Application of robots in industry,</p> <p>E-manufacturing,</p> <p>Additive manufacturing,</p> <p>Internet of things,</p> <p>CAD/CAM applications</p> <p>Data analysis, machine learning, artificial intelligence,</p> <p>Industry 4.0.,</p> <p>Information systems used to manage production processes, as well as supporting engineering works,</p> <p>Global trends in the development of information technologies.</p>		
Prerequisites and co-requisites	Basics of computer science, Internet, ability to use MS Office.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Project	50.0%	100.0%
