

## Subject card

Subject name and code	Management and Control in Power Industry, PG_00055967							
Field of study	Power Engineering, Power Engineering							
Date of commencement of studies	October 2021		Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies		Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	3		Language of instruction			Polish		
Semester of study	6		ECTS credits			4.0		
Learning profile	general academic profile		Assessment form			assessment		
Conducting unit	Zakład Przekształtnik Machines -> Faculty	ów i Magazyno of Electrical and	wania Energii	of Pow	er Electronics and Electrical			
Name and surname	Subject supervisor		dr hab. inż. Robert Małkowski					
of lecturer (lecturers)	Teachers		dr hab. inż. Robert Małkowski					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial Laboratory Project		t	Seminar	SUM	
	Number of study hours	15.0	0.0	15.0	15.0		0.0	45
	E-learning hours inclu	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in classes include plan		Participation i consultation h		Self-study		SUM
	Number of study hours	45		6.0		49.0		100
Subject objectives	Presentation of the basic issues related to electric power system operation. In particular the power units and their participation in the control of voltage and frequency.							
Learning outcomes	Course outcome		Subject outcome			Method of verification		
	[K6_W08] has basic knowledge in the field of intellectual property protection and patent law, knows and understands the basic processes of energy production and use, knows and understands the principles of modern heating and power systems		The student is able to describe the ways of controlling U and f in the power system.			[SW1] Assessment of factual knowledge		
	[K6_U03] has the preparation		Student potrafi przeprowadzić diagnostykę systemu regulacji prostego obiektu energetycznego			[SU2] Assessment of ability to analyse information		
Subject contents	Lecture: Connecting electric power subsystems to parallel running after system breakdown. Frequency controll in a Power Systems. Influence of automatic control of a tap changing step-up transformer on power capability area of generating unit. Voltage stability.							
	Laboratory: Coupling parameters of simple power grid model elements (generators, transformers, power lines) to conduct research including various load level in modeled power grid. Calculating load flow. Dependencies of voltage changed and/or transformer tap controllers moves on voltage levels and load flow in analyzed grid.							
Prerequisites and co-requisites								
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade			
	Laboratory		50.0%		40.0%			
	Lecture		50.0%			60.0%

	eResources addresses	Adresy na platformie eNauczanie:			
		Zarządzanie i sterowanie w energetyce [2023/24] - Moodle ID: 35867 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=35867			
Example issues/ example questions/ tasks being completed	Describe influence of automatic control of a tap changing step-up transformer on power capability area of generating unit.				
	Describe the basic properties of selected FACTS systems				
Work placement	Not applicable
