

## 。 GDAŃSK UNIVERSITY OF TECHNOLOGY

## Subject card

Subject name and code	BSc Diploma Project, PG_00055973							
Field of study	Power Engineering, Power Engineering, Power Engineering							
Date of commencement of studies	October 2021		Academic year of realisation of subject		2024/2025			
Education level	first-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	4		Language of instruction		Polish			
Semester of study	7		ECTS credits		16.0			
Learning profile	general academic profile		Assessment form		assessment			
Conducting unit	Department of Metrology and Information Systems -> Faculty of Electrical and Control Engineering							
Name and surname of lecturer (lecturers)	Subject supervisor Teachers		dr inż. Anna Golijanek-Jędrzejczyk					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	0.0		0.0	0
	E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study		SUM
	Number of study hours	0		25.0		375.0		400
Subject objectives	Completion of an engineering diploma thesis.							

Learning outcomes	Course outcome	Subject outcome	Method of verification				
	[K6_U13] can read architectural, construction and geodesy drawings, and can use the known computer software to prepare a drawing part of technical documentation for the sanitary, energy, hydropower industry and prepare a text or presentation including a discussion of the implemented results	oprogramowanie , aby zaprezentować własne wyniki realizacji zadania. Sprawdź szczegóły 332 / 5 000 Wyniki tłumaczenia Tłumaczenie Completion of an engineering diploma thesis. The student has knowledge about rights	[SU5] Assessment of ability to present the results of task [SU4] Assessment of ability to use methods and tools [SU2] Assessment of ability to analyse information				
		copyright and patent rights. He knows how to gain knowledge from it range. The student can work in team and accept different ones in it roles.					
		The student is able to use various studies and software to present their own results of the task.					
	[K6_K01] is aware of the need for training and self-improvement in the profession of energy and the possibility of further education; can think and act in a creative and entrepreneurial manner; can define priorities for the implementation of an individual or group task	The student is aware of professional training in his profession. The student can think creatively. The student is able to prioritize tasks during the project.	[SK5] Assessment of ability to solve problems that arise in practice [SK3] Assessment of ability to organize work [SK2] Assessment of progress of work [SK1] Assessment of group work skills				
	[K6_U01] can obtain information from literature and other sources, organize, interpret it and draw and formulate conclusions; has the ability to self-educate, interprets the results of completed engineering tasks, is able to design simple energy systems and their systems	The student is able to obtain information from various sources, interpret them and draw conclusions. The student is able to design simple energy systems and their systems.	[SU5] Assessment of ability to present the results of task [SU4] Assessment of ability to use methods and tools [SU3] Assessment of ability to use knowledge gained from the subject [SU2] Assessment of ability to analyse information				
	[K6_W08] has basic knowledge in the field of intellectual property protection and patent law, knows and understands the basic processes of energy production and use, knows and understands the principles of modern heating and power systems	The student has knowledge about rights copyright and patent rights. Student knows how to gain knowledge from it range.	[SW3] Assessment of knowledge contained in written work and projects [SW1] Assessment of factual knowledge				
	[K6_K02] is able to work in a group taking different roles in it, can think and act in an entrepreneurial way, is aware of responsibility for their own work and responsibility for teamwork	The student can work in team and accept different ones in it roles.	[SK3] Assessment of ability to organize work [SK2] Assessment of progress of work [SK1] Assessment of group work skills				
Subject contents	Legal requirements for obtaining a university diploma, organization of own research, requirements for diploma theses, their defense and the diploma examination.						
	Copyright issues.						
	Writing a diploma thesis: preparation of a diploma thesis, publication components, elaboration of the state of affairs on the basis of standards and literature (books, scientific publications) related to the subject of the work, technique of writing a scientific study, editorial preparation of publications.						
Prerequisites and co-requisites	Completion of an engineering diploma thesis.						
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade				
and criteria	Project	100.0%	100.0%

	Supplementary literature	-			
	eResources addresses	Adresy na platformie eNauczanie:			
Example issues/ example questions/ tasks being completed	What was the purpose of the thesis?				
	Has the goal been achieved?				
	How and what kind of experimental and simulation studies were carried out?				
	Whether the set scope of work has been fully implemented?				
Work placement	Not applicable
