

Subject card

Subject name and code	, PG_00056123						
Field of study	Mechatronics						
Date of commencement of studies	October 2021	Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies	Subject group					
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	6	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Institute of Mechanics and Machine Design -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Ryszard Jasiński				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		0.0		0.0	30
Subject objectives	To acquaint students with the structure and principle of operation of mechatronic devices in medicine						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U06] is able to identify and formulate specification of simple, practical engineering tasks, distinctive for mechatronics		Student is able to identify and formulate the specification of simple engineering tasks of a practical nature, characteristic of mechatronic devices used in medicine.		[SU2] Assessment of ability to analyse information		
	[K6_U05] is able to use properly chosen tools to compare design solutions of elements and mechatronics systems according to given application and economic criteria (e.g. power demand, speed, costs)		Student is able to use properly selected tools in the basic scope in order to compare the design solutions of mechatronic elements and systems used in medicine, due to the set operational and economic criteria.		[SU1] Assessment of task fulfilment		
	[K6_W10] has a basic knowledge about development trends in terms of engineering and technical sciences and scientific disciplines: Mechanical Engineering, Automation, Electronics and Electrical Engineering, adequate for Mechatronics course		Student has a basic knowledge of development trends in the field technical sciences and scientific disciplines: Mechanical Engineering and Automation, Electronics and Electrical Engineering, appropriate for the field of Mechatronics studies. Student explains the structure and principle of operation of mechatronic devices in medicine.		[SW3] Assessment of knowledge contained in written work and projects		
	[K6_W08] knows and understands design and production processes of elements and simple mechatronic devices		Student understands the processes of designing and manufacturing elements and simple mechatronic devices used in medicine.		[SW2] Assessment of knowledge contained in presentation [SW3] Assessment of knowledge contained in written work and projects		

Subject contents	<p>Construction and operation of respirators. Transport devices (transport trolleys, stair climbers, transport vehicles). Upper limb and torso braces. Finger, upper and lower limb prostheses. Designing a bionic arm (pneumatic muscles, equation of motion, kinematic diagram). Units (elements and equipment, pneumatic diagrams). Dental compressors. Devices for supporting blood circulation (human heart, cardiovascular support, counterpulsation methods, peristaltic pumps, artificial hearts). Kidney dialysis devices (kidney function, hemodialysis, artificial kidney functional system, semi-permeable membrane, peritoneal dialysis). Construction and operation of endoscopes. X-ray machine (construction of the X-ray apparatus, power supply system, construction of the X-ray tube, X-ray machines). Medical robots (classification of medical robots, assistant robots, precise positioning and displacement systems, manipulators and diagnostic cameras). Surgical robots (telem manipulators, ZEUS and Robin Heart surgical robots, surgical materials and tools). Urology robot (construction of the MrBot robot, construction and control of the PneuStep motor).</p>											
Prerequisites and co-requisites	<p>Basics of automations</p> <p>Basics of hydraulics and pneumatics</p> <p>Components of mechatronic systems</p>											
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="453 875 794 904">Subject passing criteria</th> <th data-bbox="794 875 1142 904">Passing threshold</th> <th data-bbox="1142 875 1489 904">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="453 909 794 938">Midterm colloquium</td> <td data-bbox="794 909 1142 938">56.0%</td> <td data-bbox="1142 909 1489 938">50.0%</td> </tr> <tr> <td data-bbox="453 943 794 972">Laboratory</td> <td data-bbox="794 943 1142 972">56.0%</td> <td data-bbox="1142 943 1489 972">50.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Midterm colloquium	56.0%	50.0%	Laboratory	56.0%	50.0%
Subject passing criteria	Passing threshold	Percentage of the final grade										
Midterm colloquium	56.0%	50.0%										
Laboratory	56.0%	50.0%
