

## Subject card

Subject name and code	Databases in TFL (Transport, Forwarding, Logistics), PG_00056159						
Field of study	Transport and Logistics						
Date of commencement of studies	October 2021	Academic year of realisation of subject			2022/2023		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Faculty of Ocean Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Tacjana Niksa-Rynkiewicz					
	Teachers	dr inż. Tacjana Niksa-Rynkiewicz					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	30.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	45	5.0		25.0		75
Subject objectives	The aim of the course is to familiarize students with the possibilities of using programs and the procedures available in them during laboratory classes that enable: designing knowledge systems, creating relational databases, creating simple sql queries using queries, creating forms and reports enabling printouts. The software necessary to perform the tasks is Ms WORD, Ms Visio, Ms Access						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W04] has a basic knowledge in IT, electronics, automation and control, computer graphics useful to understand the possibilities of their application in transport		Mastering the ability to create a real database in the Ms Access environment		[SW1] Assessment of factual knowledge		
	[K6_U03] can use computer-aided design, production and operation tools for means and systems of transport		Mastering design skills in the Ms Visio environment		[SU4] Assessment of ability to use methods and tools		
Subject contents	Program content (subject of classes): 1. Introduction to databases; discussion of literature and rigor of crediting. Basic concepts, the problem of redundancy, independence, integrity. 2. File database - application, examples. 3. Relational database - relationship modeling. 4. ER scheme (Chen method). 5. Data types in Access. 6. Relational model summary: concepts, dependencies and normalization, pros and cons of normalization. 7. Database design - documentation. 8. ER scheme using the objective method. 9. Ms Access - creating databases, tables, relationships. 10. Ms Access - creating queries - queries. 11. Ms Access - creating forms and reports. 12. Ms Access - creating queries - queries. 13. Ms Access - creating forms and reports. 14. Presentation and discussion of exemplary implemented database projects. 15. Presentation and discussion of exemplary implemented database projects.						
Prerequisites and co-requisites	knowledge of the terminology of programming in English						

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	project	60.0%	90.0%
	activity	50.0%	10.0%

	eResources addresses	Adresy na platformie eNauczanie:
Example issues/ example questions/ tasks being completed	TASK: Please propose an entity relationship diagram to remember:planned and carried out cruises, club members and their stages, yachts together with their sailing possibilities (waters they can swim on) for the presented sailing clubThe sailing club creates a database to facilitate the completion of crews for planned cruises. The yacht-club owns yachts with various nautical (sailing) possibilities, which can sail on various waters. Also, club members - sailors - have different qualifications, allowing them to perform various functions on various cruises. These qualifications are strictly defined by each sailor's degree,confirmed by a patent with a unique number.
