

## Subject card

Subject name and code	Maritime Logistics, PG_00056199						
Field of study	Transport and Logistics						
Date of commencement of studies	October 2021	Academic year of realisation of subject			2022/2023		
Education level	first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	4	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Institute of Ocean Engineering and Ship Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Marcin Życzkowski					
	Teachers	dr inż. Marcin Życzkowski					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	15.0	0.0	0.0	0.0	45
	E-learning hours included: 0.0						
Address on the e-learning platform: <a href="https://enauczanie.pg.edu.pl/moodle/course/view.php?id=11672">https://enauczanie.pg.edu.pl/moodle/course/view.php?id=11672</a>							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	45	6.0		49.0		100
Subject objectives	Presentation of the basic concepts and definitions of logistics, the area of interest, acquire skills of solving logistic problems.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_U07] applies knowledge on humanities, social and economical science in solving problems	The student acquires skills in the implementation of tasks related to planning a sea route, taking care of supplies and safety during a sea voyage.			[SU1] Assessment of task fulfilment [SU5] Assessment of ability to present the results of task		
	[K6_W07] has a general knowledge on humanities, social and economical sciences. Knows the rules of creating the forms of personal entrepreneurship and economic activity, has knowledge on the protection of intellectual property rights and industrial property rights and copyrights	The student acquires knowledge of maritime logistics, including the basics of sea route planning, the basics and rules of maritime transport. He has knowledge of E-Maritime and E-Transport support systems.			[SW1] Assessment of factual knowledge [SW2] Assessment of knowledge contained in presentation		

<b>Subject contents</b>	<p>The first part of time are an introduction to the subject of logistics, represent the genesis, the area of interest in logistics, e-environment and logistics, the basic concepts of logistics and traffic engineering and the task facing the logistics.</p> <p>The development of the subject object present in the form of 6 modules.</p> <p>Earth, Sea, Transportation</p> <p>Mathematics, Graphs, Logistics</p> <p>The first 7 weeks of classes are implemented 3 modules (Earth, Sea, Transport) bound with traffic engineering are discussed topics such as geodesy, geophysics, geomorphology, geomagnetism, geography, sea, marine navigation and aviation, communications, law of motion at sea and in the air , object speed, distance traveled, position and its determination. Calculation of the final parameters conducted trip ETA ,stocks. This part ends with a test.</p> <p>During the semester is scheduled a visit to the VTS Gulf of Gdansk - The vessel traffic in the Gulf of Gdansk</p> <p>The second part of semester are implemented 3 new modules (Mathematics, graphs, Logistics) knowledge gained from the first part of the semester allows to implement additional modules. Traffic Engineering is used to implement optimization algorithms. The student learns the basics of graph theory and algorithms such search the shortest path algorithm minimum tree fastener algorithm to maximize flow algorithm optimal load "knapsack problem". All algorithms are illustrated in the examples of logistics and traffic engineering.</p> <p>Last exam is with traffic engineering and logistics finished this course</p>											
<b>Prerequisites and co-requisites</b>												
<b>Assessment methods and criteria</b>	<table border="1"> <thead> <tr> <th data-bbox="453 934 794 965">Subject passing criteria</th> <th data-bbox="794 934 1139 965">Passing threshold</th> <th data-bbox="1139 934 1493 965">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="453 972 794 1003">Exam</td> <td data-bbox="794 972 1139 1003">50.0%</td> <td data-bbox="1139 972 1493 1003">50.0%</td> </tr> <tr> <td data-bbox="453 1010 794 1039">Exam</td> <td data-bbox="794 1010 1139 1039">50.0%</td> <td data-bbox="1139 1010 1493 1039">50.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Exam	50.0%	50.0%	Exam	50.0%	50.0%
