

## Subject card

Subject name and code	Specifics of the container transport system, PG_00056215								
Field of study	Transport and Logistics								
Date of commencement of studies	October 2021		Academic year of realisation of subject			2023/2024			
Education level	first-cycle studies		Subject group			Optional subject group Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	3		Language of instruction			Polish			
Semester of study	5		ECTS credits			5.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Department of Ship Manufacturing Technology, Quality Systems and Materials Science -> Faculty of Mechanical Engineering and Ship Technology					ulty of			
Name and surname	Subject supervisor dr inż. Ryszard Pyszko								
of lecturer (lecturers)	Teachers		mgr inż. Dariusz Duda						
	dr inż. Ryszard Pyszko								
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	:t	Seminar	SUM	
	Number of study hours	30.0	0.0	0.0	0.0		30.0	60	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity	rning activity Participation ir classes including plan				Self-study		SUM	
	Number of study hours	60	10.0		55.0		125		
Subject objectives	The aim of education is to provide graduates with the knowledge of the functioning of modern transport, in particular: the operation of transport systems, engineering infrastructure and means of transport and traffic engineering and transport traffic associated with the container transport system								
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	[K6_W05] has an organized knowledge on design, construction and operation of means and systems of transport		The student learns about the construction of a transport unit - a container, methods of securing the container, methods of securing cargo in the container and the permissible loads of the container.			[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects			
			The student is able to work out issues related to the preparation of transport documentation, determine the requirements of cargo securing and meet the convention requirements			[SU2] Assessment of ability to analyse information [SU5] Assessment of ability to present the results of task			
Subject contents	Features container transport system: packaging of cargo, marking of cargo, marking of cargo - unit.  Description of individual items of cargo as the port of the production process. The definition of the container.  General classification of container. Parameters Series I of ISO containers. Containers "land / sea". Types of damage caused by the possible movements of cargo in containers. Choosing the right type of container. Features packs with container transport. Rules stowage of containers and cargo containers. Types of dunnage. Features of the pallet for use in containers.  Definition of the availability of transport and transport accessibility determinants. The detailed characterization of transport accessibility Gdańsk port, the port of Gdynia, Szczecin and Swinoujscie.								
Prerequisites and co-requisites	Knowledge from subject: Ładunkoznawstwo TW.9402.1.								
Accomment matheds		Dessing threehold			Damandan - f.H f.				
Assessment methods and criteria	Subject passing criteria		Passing threshold 50.0%			Percentage of the final grade 50.0%			
	seminar - presentation paper test		50.0%		50.0%				
Data wydruku: 08 05 2024			1 - 5 . 5 / 5			Strong
