

Subject card

Subject name and code	, PG_00056253						
Field of study	Design and Construction of Yachts						
Date of commencement of studies	October 2021	Academic year of realisation of subject			2022/2023		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to practical vocational preparation		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			English Polish		
Semester of study	4	ECTS credits			3.0		
Learning profile	practical profile	Assessment form			assessment		
Conducting unit	Department of Theory and Ship Design -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Artur Karczewski				
	Teachers		dr inż. Artur Karczewski mgr inż. Ewelina Ciba				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	30.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		5.0		25.0	75
Subject objectives	Mastering the methods of designing sails propulsors.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K6_U03		The student can use the computer aided tools the design of a sail propulsion		[SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to present the results of task		
	K6_W05		The student has knowledge of the design of yachts and issues related to their operation		[SW3] Assessment of knowledge contained in written work and projects		
	K6_U05		The student can solve engineering tasks in the field of designing a sail propulsion for yachts		[SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to present the results of task		
Subject contents	Lecture: The environment of the sails. Air and wind in nature. Type of sails arrangement. Creation of a forces on a sail propulsions. Theory of lifting plate - mathematical models (boundary vortex, free vortex, induced velocity, distribution of circulation and pressure on sail plate). Influence of sails plane outline and slender on aero-dynamics characteristics. Measure of merit of aerodynamics efficiency of sail propulsions. Relation between lifting force and trust. Theory of thin sections. Cooperation of sails in stack and palisade configurations. Geometry of sail plate. VPP (Velocity and Stability Prediction Programs),VMG (velocity made good). Temporary technology and fabric in sails manufacture. Design: - sails plan of sailing yacht - sails balance - VPP ans SPP calculations - drawing - Rig and Sails Plane.						
Prerequisites and co-requisites	The knowledge of mechanics, hydromechanics, ship theory, ship design.						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	test		51.0%		75.0%		
	project		100.0%		25.0%		

Recommended reading	Basic literature	1. Milewski Z.; Sailing Yacht Design , Gdynia, Milewski J. 1999 (in polish) 2. Larsson L., Eliasson R.; Principles of Yacht Design, Adlard Cole Nautical 1994 3. Claughton, Wellicome, Shenoi; Sailing Yacht Design Theory, Longman ,Dorchester 1998 4. Machaj Cz. ; Sailing theory and Practice, London; Adlard Coles Nautical 1979
	Supplementary literature	1. Durand W.F.; Aerodynamics Theory , vol.IV Ney York 1963 2. Abbott I.S., Doenhoff A.E.; Theory of wing sections, Dover Publication, NY 3. Hoerner S.F.; Fluid Dynamic Lift, Hoerner S.F- 1975 4. Hoerner S.F.; Fluid Dynamic Drag, Hoerner S.F- 1975
