

## Subject card

Subject name and code	, PG_00056309							
Field of study	Ocean Engineering							
Date of commencement of studies	October 2021		Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies		Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	3		Language of instruction			Polish		
Semester of study	5		ECTS credits			2.0		
Learning profile	general academic profile		Assessment form			assessment		
Conducting unit	Department of Theory	ign -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname	Subject supervisor		dr inż. Maciej Reichel					
of lecturer (lecturers)	Teachers	dr inż. Maciej Reichel						
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	oratory Project Seminar		Seminar	SUM
of instruction	Number of study hours	30.0	0.0	0.0	0.0		0.0	30
	E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity	Participation in classes include plan		Participation in consultation hours		Self-study		SUM
	Number of study hours	30		3.0		17.0		50
Subject objectives	To acquaint students with of ship power plants specialization with selected problems in the field of creating the initial ship design based on the design requirments set by the shipowner.							
Learning outcomes	Course outcome		Subject outcome			Method of verification		
	[K6_W06] has an organized knowledge on engineering methods and design tools allowing the conducting of projects within the construction and operation of ocean technology objects and systems					[SW1] Assessment of factual knowledge		
	[K6_W08] has knowledge of the principles of sustainable development					[SW1] Assessment of factual knowledge		
Subject contents	Main design parameters of the ship - nomenclature and defining terms; Design spiral; Presentation of classic sets of design assumptions; functional types of ships; The issue of determining the values of the design parameters of the steering-propulsion system of a transport vessel: Manoeuvring safety of ships.							
Prerequisites and co-requisites	In the initial semesters, the student completed the knowledge of the basics of ship design.							
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade			
	Written credit 100%		60.0%			100.0%		
Recommended reading	Basic literature		Jan P. Michalski, Fundamentals of sl University of Technology Publishing					
	Supplementary literature		Discussed during classes with stude			nts.
