|---|--|--|--|-------------------------------------|---|------------|-----|
| Subject name and code | Technical Mechanics 1, PG_00056413 | | | | | | |
| Field of study | Ocean Engineering | | | | | | |
| Date of commencement of studies | October 2021 | | Academic year of realisation of subject | | 2021/2022 | | |
| Education level | first-cycle studies | | Subject group | | Obligatory subject group in the field of study Subject group related to scientific research in the field of study | | |
| Mode of study | Full-time studies | | Mode of delivery | | at the university | | |
| Year of study | 1 | | Language of instruction | | Polish | | |
| Semester of study | 2 | | ECTS credits | | 5.0 | | |
| Learning profile | general academic profile | | Assessment form | | exam | | |
| Conducting unit | Faculty of Ocean Engineering and Ship Technology | | | | | | |
| Name and surname of lecturer (lecturers) | Subject supervisor | | dr hab. inż. Tomasz Mikulski | | | | |
| | Teachers | | dr hab. inż. Beata Zima dr hab. inż. Tomasz Mikulski mgr inż. Paweł Bielski | | | | |
| Lesson types and methods of instruction | Lesson type | Lecture | Tutorial | Laboratory | Project | Seminar | SUM |
| | Number of study hours | 30.0 | 30.0 | 0.0 | 0.0 | 0.0 | 60 |
| | E-learning hours included: 0.0 | | | | | | |
| | Adresy na platformie eNauczanie: Mechanika techniczna I, WC, Oce, sem. 2, letni 21/22 (PG_00056413) - Moodle ID: 23021 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=23021 | | | | | | |
| Learning activity and number of study hours | Learning activity | Participation in didactic classes included in study plan | | Participation in consultation hours | | Self-study | SUM |
| | Number of study hours | 60 | | 10.0 | | 55.0 | 125 |
| Subject objectives | Knowledge and understanding of the problems of statics, kinematics and dynamics of the material point, the system of particles and rigid bodies. | | | | | | |
| Learning outcomes | Course outcome | | Subject outcome | | Method of verification | | |
| | [K6_W02] has a basic knowledge in physics, including technical mechanics, fluid mechanics, solid-state physics, optics and acoustics necessary to understand basic physical phenomena occurring in ocean technology | | The student acquired the skills solving technical problem based on the law mechanics. | | [SW3] Assessment of knowledge contained in written work and projects [SW1] Assessment of factual knowledge | | |
| | [K6_U02] can work individually and in a team, communicate through various techniques in professional environment and also record, analyse, and present the results of work, can estimate the time needed to complete a given task | | The student is able to recognize the problem of technical mechanics allowing to assess the behavior of structural systems and marine equipment | | [SU5] Assessment of ability to present the results of task [SU3] Assessment of ability to use knowledge gained from the subject [SU1] Assessment of task fulfilment | | |

| Subject contents | <p>STATICS: Force projection on to an axis. Moment of a force about a point and an axis. Parallel shifting of a force, reduction of a set of forces. Equilibrium conditions and equations for a plane and space rigid body systems. Reactions of a simply supported beam loaded with generalized forces. Centers of gravity of solid, flat and linear systems. Determination of internal forces in flat truss systems. Resistance forces: sliding friction and rubbing of the rope with a roller.</p> <p>KINEMATICS: Kinematics of a material point, track of motion, velocity, acceleration, motion along a straight line, circular track, normal and tangential components of acceleration. Compound motion, absolute and relative motion analyses. Description of the motion of a rigid body. Planar kinetics of a rigid body, temporary center of the rotation, planar mechanisms.</p> <p>DYNAMICS: Dynamics of a particle, direct and inverse problems, differential equations of motion, integration of a planar motion analytical solutions, d'Alembert principle, momentum and angular momentum conservation laws, energy conservation law, constrained motion. Dynamics of a set of particles, equations of motion of the mass center. Dynamics of continuous systems, planar motion of a rigid body, rotation about a fixed axis, moments of inertia, parallel-axis theorem.</p> | | | | | | | | | | | |

| Example issues/ example questions/ tasks being completed | <ol style="list-style-type: none">1. Reduce the flat system of forces acting on the rectangular shield.2. Determine reactions in a simply supported beam loaded with generalized forces.3. Determine inner forces in flat truss structure.4. Determine the magnitudes of P_{max} and P_{min} for the limit equilibrium state of a block on the sloping row including the combination of cases with the sliding friction.5. Defined is the equation of movement of a material point. Determine the path, speed and acceleration at a given moment t.6. The wheel of radius r is moving with a constant velocity of the center. What is the velocity and acceleration of a circumference point.7. Determine the path equation and the flight range of the fired bullet at a given angle and at a predetermined initial velocity. Ignore the air resistance.8. Determine the mass moments of inertia of the flat system with respect to the given axes. | | | | | | | | | | | |
