Subject objectives	Introduction to basic topics of commercial costs and economics.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_W12] has detailed, theoretically founded knowledge of methods and techniques used in production quality control processes, statistical process control, modern techniques and measurement systems in quality assurance and information techniques in production systems	The student is able to make simple analyses of costs and revenues. The student knows basic economic laws enabling prediction of income and costs.			[SW3] Assessment of knowledge contained in written work and projects		
	[K6_U11] is able to identify and formulate simple engineering tasks related to the diagnostics of the technical condition of machines and devices using appropriate methods, techniques and tools	Student understands the non-technical conditions of engineering activities and has basic knowledge of cost management and business.			[SU2] Assessment of ability to analyse information		
	[K6_K01] feels the need for self-realization by learning throughout life, is looking for modern and innovative solutions in their actions, is able to think creatively and act in an entrepreneurial way	Student is able to determine the level of their competences. He or she is aware of the necessity of up-to-date supplementation of knowledge, can act in an entrepreneurial and innovative way.			[SK4] Assessment of communication skills, including language correctness

Example issues/ example questions/ tasks being completed	<ol style="list-style-type: none"> 1. Explain the task of economics, 2. Explain what economists understand the concepts: scarcity, good availability, allocation. 3. Characterize the roundabout circulation in the economy. 4. Formulate arguments showing that the competitive price is determined at the point of equilibrium at the intersection of supply and demand. 5. Describe the role (the essence) of money in the economy. 6. Define the role of banks. What is the function of obligatory reserves? 7. Explain the concepts of fixed costs, variable costs, average cost, opportunity cost. 8. Outline the basic principles in accounting. 9. Describe basic cost management strategies. 10. Characterise the cost allocation keys, 11. Describe cost standards, 12. Budgetary control of costs.
