

Subject card

Subject name and code	Urban Planning II, PG_00053932						
Field of study	Spatial Development						
Date of commencement of studies	October 2020	Academic year of realisation of subject	2021/2022				
Education level	first-cycle studies	Subject group					
Mode of study	Full-time studies	Mode of delivery	at the university				
Year of study	2	Language of instruction	Polish				
Semester of study	3	ECTS credits	5.0				
Learning profile	general academic profile	Assessment form	assessment				
Conducting unit	Department of Urban Design and Regional Planning -> Faculty of Architecture						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. arch. Roman Ruczyński					
	Teachers	dr inż. arch. Roman Ruczyński mgr inż. arch. Marta Radziszewska					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	30.0	0.0	45
	E-learning hours included: 0.0						
	Address on the e-learning platform: https://enauczanie.pg.edu.pl/moodle/course/view.php?id=8039 Adresy na platformie eNauczanie:						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	45	0.0	0.0	45		
Subject objectives	Providing the students with the basic issues associated with design of housing areas						
	Developing the knowledge, abilities and competencies associated with the urban design of the urban structures with dominating housing component						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K6_K03] is aware of the social role of the spatial planning engineer, understands the need to promote, formulate and communicate to the public information and opinions about activities in the profession; is prepared to act in accordance with the principles of professional ethics, while taking care to cultivate the achievements and traditions of the profession of an urban planner and planner	Understands the role of design activity as a tool for shaping the space and living quality for residents.	[SK2] Assessment of progress of work
	[K6_U08] performs an urban project with a basic degree of complexity, in accordance with the set specification, applicable rules, legal provisions and taking into account economic factors, and prepares an outline of its implementation strategy; prepares elements of planning documentation, cooperating with industry specialists	Develops an urban design referred to specific complexity level, in accordance with the given scope of issues.	[SU1] Assessment of task fulfilment
	[K6_W07] knows the determinants of spatial economy in the field of social and economic sciences, including socio-cultural and legal issues	Recognises the role and importance of social relations as an element of shaping the living environment.	[SW3] Assessment of knowledge contained in written work and projects
	[K6_W01] has knowledge related to theoretical and practical issues in the field of spatial management, the basics of planning and urban design and principles of local, regional and national development, and has basic knowledge about contemporary trends of development and revitalization of settlement structures and the life cycle of facilities and systems related to the functioning of settlement units	Has knowledge related to theoretical and practical issues in the field of spatial management and urban design at the local level.	[SW3] Assessment of knowledge contained in written work and projects
	[K6_U06] properly analyses the causes and the course of the process, and the social, cultural, political, legal and economic problems affecting changes in space, including those resulting from historical circumstances; makes design decisions based on social conditions, respecting the needs of users, the cultural environment	Recognises and correctly interprets the phenomena and relations between the space and its users.	[SU1] Assessment of task fulfilment
Subject contents	<p>Lectures: Genesis of the contemporary interest in shaping the housing areas; Typology of the contemporary approaches towards shaping the urban areas; Basic principles associated with shaping the contemporary housing areas; Basic types and sorts of contemporary housing structures</p> <p>Seminars: Basic types of housing structures and buildings. Contemporary housing environment and factors determining its quality. Social infrastructure of the contemporary city. Primary and secondary elements of urban composition. Pedestrian and vehicle-based transportation. Key composition-functional backbones of urban structures. Urban space as the synergy of composition, land-uses and users.</p> <p>Design: Analysis of the context of the site. Defining the social, economic and composition determinants of the new housing structures. Defining the project outlines. Defining the composition and functional proposal of the new urban structure. Defining the detailed solution for the part of the designed structure.</p>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Written test	60.0%	20.0%
	Seminar presentation	100.0%	20.0%
	Project	100.0%	60.0%
