

## Subject card

Subject name and code	The impact of energy sector on the climate, PG_00057270						
Field of study	Power Engineering, Power Engineering, Power Engineering						
Date of commencement of studies	February 2022	Academic year of realisation of subject				2022/2023	
Education level	second-cycle studies	Subject group				Optional subject group Subject group related to scientific research in the field of study	
Mode of study	Full-time studies	Mode of delivery				at the university	
Year of study	1	Language of instruction				Polish	
Semester of study	2	ECTS credits				3.0	
Learning profile	general academic profile	Assessment form				assessment	
Conducting unit	Zakład Systemów i Urządzeń Energetyki Ciepłej -> Institute of Energy -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. inż. Dariusz Mikielawicz				
	Teachers		prof. dr hab. inż. Dariusz Mikielawicz dr inż. Paweł Ziółkowski dr inż. Paweł Dąbrowski				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	15.0	0.0	15.0	0.0	45
	E-learning hours included: 0.0						
	Wpływ energetyki na klimat - Moodle ID: 27045 <a href="https://enauczanie.pg.edu.pl/moodle/course/view.php?id=27045">https://enauczanie.pg.edu.pl/moodle/course/view.php?id=27045</a> Wpływ energetyki na klimat - Moodle ID: 27046 <a href="https://enauczanie.pg.edu.pl/moodle/course/view.php?id=27046">https://enauczanie.pg.edu.pl/moodle/course/view.php?id=27046</a> Wpływ energetyki na klimat - Moodle ID: 27047 <a href="https://enauczanie.pg.edu.pl/moodle/course/view.php?id=27047">https://enauczanie.pg.edu.pl/moodle/course/view.php?id=27047</a>						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	45	7.0	23.0	75		
Subject objectives	The aim of the course is to familiarise students with the impact of energy systems on the climate and its anthropogenic changes.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K7_K05] is aware of the impact of engineering activities on the environment	Verified knowledge of thermodynamics of thermodynamic cycles.			[SK2] Assessment of progress of work		
	[K7_U05] is able to integrate technical and economic analysis of the use of various energy technologies, including technologies using renewable energy sources and conventional and nuclear energy	Verified exergetic analysis with environmental cost analysis.			[SU4] Assessment of ability to use methods and tools		
	[K7_W71] has general knowledge in humanistic, social, economic or legal sciences, including their fundamentals and applications	The energy strategies of Poland, the European Union and global agreements in the area of energy mixes and climate change prevention are presented.			[SW1] Assessment of factual knowledge		
	[K7_W07] knows the environmental effects of energy technologies used; is familiar with the issues of effective energy management and use of renewable energy sources, has a broad and well-established knowledge of the processes of energy production and use	Student is able to demonstrate the basic combustion reactions of basic fuels and determine the carbon footprint from common fuels and technologies.			[SW3] Assessment of knowledge contained in written work and projects		

Subject contents	<p>1. Basic statistics on energy consumption in Poland, the EU and worldwide. Basic treaties introducing emission limitations. Energy policy of Poland, the EU and the world.</p> <p>2. Characteristics of the formation of the atmosphere and its changes over time. Models for determining the equilibrium temperature.</p> <p>3. Causes and mechanisms of climate change.</p> <p>4. Exergy and the determination of the environmental cost.</p> <p>5 Determination of the carbon footprint of different energy technologies</p> <p>6. Prospective low carbon technologies and opportunities for decarbonisation of the Polish economy.</p>														
Prerequisites and co-requisites	Knowledge of thermodynamics I and II especially in the area of therodynamic cycles.														
Assessment methods and criteria	<table border="1" data-bbox="448 456 1487 595"> <thead> <tr> <th data-bbox="448 456 794 495">Subject passing criteria</th> <th data-bbox="794 456 1141 495">Passing threshold</th> <th data-bbox="1141 456 1487 495">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="448 495 794 524">tutorials credit colloquium</td> <td data-bbox="794 495 1141 524">60.0%</td> <td data-bbox="1141 495 1487 524">30.0%</td> </tr> <tr> <td data-bbox="448 524 794 553">project presentation</td> <td data-bbox="794 524 1141 553">60.0%</td> <td data-bbox="1141 524 1487 553">40.0%</td> </tr> <tr> <td data-bbox="448 553 794 595">lecture credit colloquium</td> <td data-bbox="794 553 1141 595">60.0%</td> <td data-bbox="1141 553 1487 595">30.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	tutorials credit colloquium	60.0%	30.0%	project presentation	60.0%	40.0%	lecture credit colloquium	60.0%	30.0%

Basic literature	Lecture notes														
Supplementary literature	Any literature on the influence of energy on climate change														
eResources addresses	Podstawowe <a href="https://enauczanie.pg.edu.pl/moodle/course/view.php?id=27047">https://enauczanie.pg.edu.pl/moodle/course/view.php?id=27047</a> - Lecture notes														
Example issues/ example questions/ tasks being completed	<ol style="list-style-type: none"> <li>1. Composition of the atmosphere at the beginning of the world's formation and at present</li> <li>2. Causes of climatic forcing</li> <li>3. Main greenhouse gases, their lifetime in the atmosphere, reasons for their presence in the atmosphere</li> <li>4 Definition of the equilibrium temperature of the earth's surface</li> <li>5. Energy balance model of the earth without and with the atmosphere</li> <li>6 Definition of albedo</li> <li>7. Basic combustion reactions of primary fuels</li> <li>8 Definition of exergy and unit costs of energy technologies</li> <li>9. Causes of acid rain</li> <li>10. Causes of smog.</li> <li>11. Examples of low carbon technologies</li> </ol>														
Work placement	Not applicable
