Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	45	0.0	0.0	45		
Subject objectives	The aim of the course is to familiarize students with the problems of planning the development of complex urban organisms on the example of districts or problem areas of Gdansk Agglomeration. The task is the analysis and general urban conception of a district or problem area of a large city. Students learn about the necessity of a systemic approach and cooperation with various specialists in improving the quality of urban structures, taking into account the functional and spatial, environmental, cultural and landscape conditions and the potential of urban structures, tested on various scales.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K6_U03] acquires, collects and classifies information in the field of spatial management from a variety of sources, including literature, databases, electronic sources, field observations, surveys and interviews; can perform urban and ruralistic inventory	The student is able to collect and classify basic information in the field of spatial planning, using a variety of sources, including electronic. He can carry out a multi-faceted urban analysis.	[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information [SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to present the results of task
	[K6_K01] critically evaluates the received content; Recognizes the importance of knowledge in solving cognitive and practical problems; it reflects on the ethical, scientific and social aspects related to the urban planner and planner's work	The student is able to critically evaluate the information provided to him, understands the role of knowledge in solving problems, knows the need to acquire knowledge in various areas in the profession of an urban planner.
