GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Energy conversion laboratory I, PG_00037291		
Field of study	Technical Physics		
Date of commencement of studies	October 2022	Academic year of realisation of subject	2024/2025
Education level	first-cycle studies	Subject group	Optional subject group Subject group related to scientific research in the field of study
Mode of study	Full-time studies	Mode of delivery	at the university
Year of study	3	Language of instruction	Polish
Semester of study	5	ECTS credits	2.0
Learning profile	general academic profile	Assessment form	assessment
Conducting unit	Institute of Physics and Applied Computer Science -> Faculty of Applied Physics and Mathematics		
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Daniel Pelczarski	
	Teachers	dr inż. Daniel Pelczarski	

Lesson types and methods of instruction

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	0.0	0.0	15.0	0.0	0.0	15

E-learning hours included: 0.0

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	15	5.0	30.0	50

Subject objectives

1. Utilisation of the knowledge of thermodynamics, quantum physics, physics of gases, heat transport as well as theory of electric circuits.

2. Ability to plan and perform the measurements of physical quantities.

3. Ability to eleborate and present in a written form the results of measurements.

Learning outcomes

Course outcome	Subject outcome	Method of verification
K6_W08	Possesses the knowledge of planning and conducting a physical experiment in the field of renewable energy sources and the critical analysis of its results.	[SW3] Assessment of knowledge contained in written work and projects
K6_U04	Can plan and conduct experiments in the field of research of various energy conversion systems, critically analyze their results, draw conclusions and formulate opinions. Has experience in laboratory work.	[SU2] Assessment of ability to analyse information [SU1] Assessment of task fulfilment [SU3] Assessment of ability to use knowledge gained from the subject
K6_W12	Knows the basic principles of occupational health and safety while testing various energy conversion systems	[SW1] Assessment of factual knowledge
K6_W07	Possesses the basic knowledge of the construction and operation of physical instruments, measurement and research equipment used for testing various energy conversion systems.	[SW1] Assessment of factual knowledge

<table>
<tr><td>Subject contents</td><td>The set of experiments: 1. Investigation of a battery of solar cells. 2. Investigation of emissivity of various surfaces as a function of temperature. 3. Investigation of semiconductor thermogenerator. 4. Investigation of thermoelectric phenomena in metals. 5. Investigation of a solar collector. 6. Comparative investigations of absorbers of solar collectors . 7. Investigation of a heat pump. 8. Investigation of a solar collector - heat pump system. 9. Investigation of proton membrane fuel cell systems (2 experiments). 10. Investigation of Stirling engine. 11.Investigation of cycles of an ideal gas. 12.Investigation of a heat pump with Peltier elements. 13. Determination of thermal insulation coefficient of different materials.</td></tr>
<tr><td>Prerequisites and co-requisites</td><td>1. Advanced knowledge of thermodynamics, quantum physics, physics of gases, heat transport, theory of electric circuits. 2. Advanced knowledge of methods for experimental data and error analysis.</td></tr>
<tr><td>Assessment methods and criteria</td><td><table>
<tr><th>Subject passing criteria</th><th>Passing threshold</th><th>Percentage of the final grade</th></tr>
<tr><td>Acceptance of reports on each experiment according to schedule</td><td>100.0%</td><td>50.0%</td></tr>
<tr><td>Credit for the theory of each experiment</td><td>50.0%</td><td>50.0%</td></tr>
</table></td></tr>
<tr><td>Recommended reading</td><td><table>
<tr><td>Basic literature</td><td>1. P.Grygiel i H. Sodolski ,,Laboratorium konwersji energii"", skrypt na prawach rękopisu, Politechnika Gdańska, 2006.</td></tr>
