

Subject card

Subject name and code	Principles of General Technology, PG_00058229						
Field of study	Biotechnology						
Date of commencement of studies	October 2022		Academic year of realisation of subject		2022/2023		
Education level	second-cycle studies		Subject group		Obligatory subject group in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	1		ECTS credits		1.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Chemistry and Technology of Functional Materials -> Faculty of Chemistry						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Anna Skwierawska				
	Teachers		dr hab. inż. Anna Skwierawska				
			dr hab. inż. Andrzej Nowak				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		1.0		9.0	25
Subject objectives	Knowledge of basic concepts in the field of technology. The ability to describe the process using a schematic diagram and mass balance.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_U10] is able to use knowledge about possibilities, aims and limitations of biotechnology to develop, design and obtain products and biotechnological processes in the area of his/her specialization		The student independently assesses the strengths and weaknesses of biotechnological processes related to his specialization.		[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information [SU3] Assessment of ability to use knowledge gained from the subject		
	[K7_W08] has a profound knowledge of methods of obtaining biotechnological products, possibilities and limitations related to the design of biotechnological processes, understands the specificity of the biotechnological industry, both in terms of organization, management and economic analysis		The student knows examples of biotechnological processes using various renewable raw materials. He can determine their usefulness.		[SW1] Assessment of factual knowledge [SW2] Assessment of knowledge contained in presentation [SW3] Assessment of knowledge contained in written work and projects		
Subject contents	Principles of green engineering. Chemical technology as applied science. The genesis of a new technological process. Basic raw materials and auxiliary materials in production. Chemical concept of the method. Technological concept of the method. Unit processes. Schematic and technological scheme. Mass and heat balance of the process. Technological principles. Examples of biotechnological processes.						
Prerequisites and co-requisites	Knowledge of chemical and biotechnological equipment.						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
			60.0%		100.0%		
Recommended reading	Basic literature		1. Marek Adamczak, Włodzimierz Bednarski, Jan Fiedurek, Fundamentals of industrial biotechnology, 1st edition, Polish Scientific Publishers PWN, Warsaw 2020 2. Jerzy Piotrowski, Józef Szarawara, Theoretical foundations of chemical technology, 1st edition, Scientific and Technical Publishers, Warsaw 2010				

	Supplementary literature	<ol style="list-style-type: none"> 1. Włodzimierz Bednarski, Arnold Reys, Food Biotechnology, 2nd edition, Polish Scientific Publishers PWN, WNT, Warsaw, 2020 2. Bjorn Kristiansen, Colin Ratledge, Translator: Stanisław Bielecki, Aleksander Chmiel, Andrzej Konowicz, Fundamentals of biotechnology, 1st edition, Polish Scientific Publishers PWN, Warsaw 2013
	eResources addresses	<p>Adresy na platformie eNauczanie:</p> <p>Podstawy Technologii Ogólnej 2022/23* - Moodle ID: 25885</p> <p>https://enauczanie.pg.edu.pl/moodle/course/view.php?id=25885</p>
Example issues/ example questions/ tasks being completed	<ol style="list-style-type: none"> 1. On the basis of the drawing showing the technological diagram of the process, a schematic diagram should be drawn. 2. Based on a verbal description of the technological process, draw a technological and schematic diagram. 3. Prepare a mass balance based on the technological description. 4. By analyzing the technological description of the process, make a judgment about compliance with the requirements of green engineering principles and technological principles. 	
Work placement	Not applicable
