

## Subject card

Subject name and code	Propedeutics of Mathematics, PG_00038084						
Field of study	Hydrogen Technologies and Electromobility						
Date of commencement of studies	October 2022		Academic year of realisation of subject		2022/2023		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	1		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Mathematics Center -> Vice-Rector For Education						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Magdalena Musielak				
	Teachers		dr Magdalena Musielak				
			mgr Karolina Lademann				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	30.0	0.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		6.0		34.0	100
Subject objectives	Students obtain competence in the range of using methods of mathematical analysis and linear algebra and knowledge to solve simple problems that can be found in the field of engineering.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K6_W01] has basic knowledge of mathematics – including linear algebra, mathematical analysis, numerical methods – necessary to describe physical and chemical phenomena, as well as the analysis of electrical circuits and automation and robotics systems	Student names basic properties of elementary functions. Student solves equations and inequalities with elementary functions. Student examines monotonicity and boundedness of sequences. Student evaluates the limits of functions. Student explains the concept of limit and continuity of functions. Student gives a graphic interpretation of discontinuity points. Student uses the basic operations on complex numbers. Student performs calculations on complex numbers. Student determines the real and complex roots of polynomial	[SW1] Assessment of factual knowledge
	[K6_K02] can work in a group taking on different roles in it	Student recognizes the importance of self-expanding knowledge and takes the challenge of working with a group to solve a problem. Student understands the need of lifelong learning. Student is able to inspire others and organize their learning process.	[SK1] Assessment of group work skills
	[K6_U02] can work individually and in a team, can communicate using various techniques in a professional environment, as well as document and analyze the results of their work, can estimate the time needed to perform the entrusted task	Student is able to process the acquired information, analyze and interpret it, draw conclusions and reason opinions. Student recognizes the importance of skillful use of basic mathematical apparatus in terms of study in the future. Student recognizes the importance of self-expanding knowledge.	[SU4] Assessment of ability to use methods and tools
Subject contents	Set of real numbers. The absolute value of real number and its properties. Functions of one variable, basic properties, composite and inverse functions. Overview of elementary functions: linear, quadratic, power, polynomials, rational, exponential, logarithmic, trigonometric, cyclometric, hyperbolic. Equations and inequalities of different types, systems of equations and inequalities. Infinite sequences - limit of a sequence, arithmetic of limits. Arithmetic and geometric sequence. Number e. Complex numbers - algebraic, trigonometric, exponential form, operations, exponentiation (Moivre formula), finding roots of complex numbers. Elements of analytic geometry - line on the plane, circle, ellipse, parabola, hyperbole. Line and plane in 3-space. Limits and continuity of functions. Properties of continuous functions.		
Prerequisites and co-requisites	- active participation in tutorials - passing written tests and colloquiums		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Work during tutorials	0.0%	10.0%
	Midterms	50.0%	90.0%

	eResources addresses	Adresy na platformie eNauczanie: WEiA (TWiE) - Matematyka 2022/23 (M.Musielak) - Moodle ID: 25714 <a href="https://enauczanie.pg.edu.pl/moodle/course/view.php?id=25714">https://enauczanie.pg.edu.pl/moodle/course/view.php?id=25714</a>	
Example issues/ example questions/ tasks being completed	1. Solve the equation . 2. Find the domain and the set of values of the function $f(x)=...$ . 3. Sketch the graph of the function $f(x)=$ . 4. Evaluate the limit of a given sequence $(a_n)$ . 5. Check the continuity of the following function $f(x)=$ .
