

Subject card

Subject name and code	Economics and organization of investment processes, PG_00055724						
Field of study	Architecture						
Date of commencement of studies	October 2022	Academic year of realisation of subject			2024/2025		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	6	ECTS credits			1.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Technical Fundamentals of Architectural Design -> Faculty of Architecture						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. arch. Rafał Janowicz					
	Teachers	dr hab. inż. arch. Rafał Janowicz					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	15	2.0		8.0		25
Subject objectives	<p>Gaining the knowledge about the economic aspects of architectural design.</p> <p>The student has a basic knowledge of economic consequences of designing, knows basic methods of measuring the costs of investment used in building process.</p> <p>The student knows basic economic vocabulary within the investing process.</p> <p>The student can define the connection between project solutions and economic consequences.</p> <p>The student can estimate costs of project works and realizations costs of selected building works.</p>						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_W05] knows and understands issues related to architecture and urban planning in the context of the multi-discipline character of architectural and urban design; laws and procedures necessary to implement building designs; estimation of costs principles, project management, cost control methodology and principles of implementing a construction project	knows and understands issues related to estimation of costs principles, project management, cost control methodology and principles of implementing a construction project			[SW1] Assessment of factual knowledge		
	[K6_U71] is able to apply knowledge from humanistic, social, economic or legal sciences in order to solve problems in a social environment	is able to apply knowledge from economic sciences in order to solve problems in a social environment			[SU3] Assessment of ability to use knowledge gained from the subject		

Subject contents	<ul style="list-style-type: none"> • Basic economic issues • Organization of architectural office • Economic analysis and compilations within project specifications • Valuation of building works • Types of estimating • Negotiations in business • Cycles of buildings life • Project management and function of project engineer • Management of project profitability • Economic consequences of masterplans • Valuation of project works • Valuation of properties • Marketing in building • Investing process participants and properties management • Describing the tools of managing the project (using the connections net with critical ways, schedule) • Regulations basis of the investing process, main participants in the process. • Architectural offices forms of activity, right of representing the company, signing contracts. • Architectural project management architect as a coordinator of investing process. (Types of project works, range of works, types of projects, functions divided within the architectural office) • Describing the issues of organizing the investing process of building; regulations basis of the Health and Safety on the building site. 								
Prerequisites and co-requisites
