

## 。 GDAŃSK UNIVERSITY OF TECHNOLOGY

## Subject card

Subject name and code	Mathematics II, PG_00055648								
Field of study	Architecture								
Date of commencement of studies	October 2022		Academic year of realisation of subject			2022/2023			
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study			
Mode of study	Full-time studies		Mode of delivery			blended-learning			
Year of study	1		Language of instruction			English			
Semester of study	2		ECTS credits			3.0			
Learning profile	general academic profile		Assessmer	Assessment form			exam		
Conducting unit	Faculty of Electronics, Telecommunications and Informatics								
Name and surname	Subject supervisor		dr inż. Magdalena Łapińska						
of lecturer (lecturers)	Teachers		dr inż. Magdalena Łapińska						
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
of instruction	Number of study hours	15.0	30.0	0.0	0.0		0.0	45	
	E-learning hours included: 15.0								
Learning activity and number of study hours	Learning activity	Participation i classes includ plan			Self-study		SUM		
	Number of study hours	45		6.0		24.0		75	
Subject objectives	Students obtain competence in using methods of mathematical analysis (single variable calculus) and knowledge how to solve simple problems that are found in the field of engineering, in particular connected to data engineering.								
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	[K6_U04] is able to use analytical methods to formulate and solve project tasks		Student applies the concepts of limit, continuity, and derivatives of functions to solve curve sketching problems. Student uses definite integral to solve geometrical problems			[SU4] Assessment of ability to use methods and tools			
	[K6_W01] knows and understands construction problems, building and engineering issues related to building design; principles, solutions, constructions and building materials used in simple engineering tasks in the field of architectural and urban design		Student defines basic concepts of differential and integral calculus on single-variable function. Student gives the graphical interpretation of definite integral. Student lists geometrical applications of definite integrals			[SW1] Assessment of factual knowledge			

Subject contents	Partial derivatives						
Subject contents							
	<ul> <li>Double integral over a rectangular region. Change of variables in double integral. Applications</li> </ul>						
	Continuity.						
	Derivative of a function of one variable. Commetrical and abarias lists matching. Paula differential in the second s						
	formulas.	Derivative of a function of one variable. Geometrical and physical interpretation. Basic differentiation prmulas.					
	.						
	Product, quotient, and chain rules.						
	•						
	Applications of differentiation. Optimization. Concavity.						
	<ul> <li>Indefinite integral. Basic formulas. Integration by parts, by substitution</li> </ul>						
	indennite integral. Dasie formulas. Integration by parts, by substitution						
	<ul> <li>Definite integral. Geometrical interpretation. Fundamental Theorem of Calculus.</li> </ul>						
	•						
	Geometrical applications of definite integrals: areas, volumes, lengths.						
	Partial derivatives						
	Double integral over rectangular and normal regions. Change of variables in double integral.						
Draraguiaitaa	Applications						
Prerequisites and co-requisites							
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade				
and criteria	Homework assignments	0.0%	20.0%				
	Final Exam	50.0%     H. Anton, Calculus with analytic	80.0%				
Recommended reading	Basic literature	<ul> <li>1989.</li> <li>Matematyka. Podstawy z elementami matematyki wyższej, edited by B. Wikieł, PG publishing house</li> <li>J.Dymkowska, D.Beger, Rachunek różniczkowy w zadaniach, PG publishing hous</li> <li>J.Dymkowska, D.Beger, Rachunek całkowy w zadaniach, PG</li> </ul>					
	Cumplementen literature	publishing house					
	Supplementary literature	<ul> <li>B.Sikora, E.Łobos, <i>A first course in calculus</i>, Publishing house of Silesian University of Technology, 2010.</li> <li>H. Anton, <i>Calculus : a new horizon</i>, John Wiley &amp; Sons, 6th ed</li> <li>K. Jankowska, T. Jankowski, <i>Zbiór zadań z matematyki</i>, PG publishing house, 2010</li> <li>W.
