

Subject card

Subject name and code	Inventory practice. Historical and architectural documentation, PG_00055667						
Field of study	Architecture						
Date of commencement of studies	October 2022	Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	4	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of History, Theory of Architecture and Monument Conservation -> Faculty of Architecture						
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. inż. arch. Aleksander Piwek				
	Teachers		prof. dr hab. inż. arch. Aleksander Piwek				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	15.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	15	3.0		57.0		75
Subject objectives	The aim of this course is to acquaint students with the basic methods of measuring historic objects, the development of techniques for their measurements and the practical application of these skills.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_K03] is ready to take responsibility for architectural and urban values in environmental protection and cultural heritage	is ready to take responsibility for architectural and urban values in environmental protection and cultural heritage			[SK3] Assessment of ability to organize work		
	[K6_W02] knows and understands the rules of gathering information and their interpretation as a part of project concept preparation; issues related to architecture and urban planning in the field of simple design problems solving	knows and understands the rules of gathering information and their interpretation			[SW3] Assessment of knowledge contained in written work and projects		
	[K6_U04] is able to use analytical methods to formulate and solve project tasks	is able to use analytical methods to formulate and solve project tasks			[SU1] Assessment of task fulfilment		
Subject contents	1. Introduction. Aim and significance of performing architectural inventory 2. Base-map and its use in architecture 3. Main object and complex measurement equipment (steel square, band, rangefinder, dumpy level, theodolite, scanning laser) 4. Plan measurement methods (warp, traverse) 5. Elevation, cross section measurement methods (setting horizontal surface, measuring angles, measuring height) 6. Architectural details measurement and survey methods 7. On-site training.						
Prerequisites and co-requisites	Inventory practice is compulsorily related to this course.						
Assessment methods and criteria	Subject passing criteria	Passing threshold			Percentage of the final grade		
	architectural inventory of monument	60.0%			100.0%		
Recommended reading	Basic literature	M. Brykowska, Podstawowe metody pomiarów i badań zabytków architektury, Warszawa: Oficyna Wydawnicza Politechniki Warszawskiej, 2003.					

	Supplementary literature	selected individually
