|---|---|--|--|-------------------------------------|--|------------|-----|
| Subject name and code                       | Theory of urban planning and design, PG_00049068                            |  |  |                                     |  |            |     |
| Field of study                              | Spatial Development   |  |  |                                     |  |            |     |
| Date of commencement of studies             | October 2022  |  | Academic year of realisation of subject  |                                     | 2022/2023  |            |     |
| Education level                             | first-cycle studies   |  | Subject group  |                                     | Obligatory subject group in the field of study<br>Subject group related to scientific research in the field of study |            |     |
| Mode of study                               | Full-time studies   |  | Mode of delivery   |                                     | at the university  |            |     |
| Year of study                               | 1   |  | Language of instruction  |                                     | Polish   |            |     |
| Semester of study                           | 1   |  | ECTS credits   |                                     | 4.0  |            |     |
| Learning profile                            | general academic profile  |  | Assessment form  |                                     | exam   |            |     |
| Conducting unit                             | Department of Urban Design and Regional Planning -> Faculty of Architecture |  |  |                                     |  |            |     |
| Name and surname of lecturer (lecturers)    | Subject supervisor  |  | prof. dr hab. inż. arch. Piotr Lorens  |                                     |  |            |     |
|   | Teachers  |  | prof. dr hab. inż. arch. Piotr Lorens<br><br>dr hab. inż. arch. Justyna Martyniuk-Pęczek<br><br>prof. dr hab. inż. arch. Aleksandra Sas-Bojarska |                                     |  |            |     |
|   |   |  |  |                                     |  |            |     |
| Lesson types and methods of instruction     | Lesson type   | Lecture  | Tutorial   | Laboratory                          | Project  | Seminar    | SUM |
|   | Number of study hours   | 60.0   | 0.0  | 0.0                                 | 0.0  | 0.0        | 60  |
|   | E-learning hours included: 0.0  |  |  |                                     |  |            |     |
| Learning activity and number of study hours | Learning activity   | Participation in didactic classes included in study plan |  | Participation in consultation hours |  | Self-study | SUM |
|   | Number of study hours   | 60   |  | 4.0                                 |  | 36.0       | 100 |
| Subject objectives                          | Making students aware of the basic concepts related to urbanism             |  |  |                                     |  |            |     |

|                                 |   |   |  |
|---------------------------------|---|---|--|
| Learning outcomes               | Course outcome  | Subject outcome   | Method of verification                             |
|                                 | [K6_U06] properly analyses the causes and the course of the process, and the social, cultural, political, legal and economic problems affecting changes in space, including those resulting from historical circumstances; makes design decisions based on social conditions, respecting the needs of users, the cultural environment   | Is able to analyze the spatial situations having in mind the entire spectrum of the issues related to urbanism  | [SU2] Assessment of ability to analyse information |
|                                 | [K6_U03] acquires, collects and classifies information in the field of spatial management from a variety of sources, including literature, databases, electronic sources, field observations, surveys and interviews; can perform urban and ruralistic inventory  | Is able to use various sources of knowledge related to urbanism   | [SU2] Assessment of ability to analyse information |
|                                 | [K6_W01] has knowledge related to theoretical and practical issues in the field of spatial management, the basics of planning and urban design and principles of local, regional and national development, and has basic knowledge about contemporary trends of development and revitalization of settlement structures and the life cycle of facilities and systems related to the functioning of settlement units | Has basic knowledge related to the urbanism   | [SW1] Assessment of factual knowledge              |
| Subject contents                | Basic concepts related to urbanism<br><br>Key elements of the urban analysis<br><br>Shaping the urban composition<br><br>Shaping the housinf structures<br><br>Shaping the complex urban structures   |   |  |
| Prerequisites and co-requisites |   |   |  |
| Assessment methods and criteria | Subject passing criteria  | Passing threshold   | Percentage of the final grade                      |
|                                 | Exam  | 50.0%   | 100.0%   |
