

Subject card

Subject name and code	Economics of cities and regions, PG_00049241								
Field of study	Spatial Development								
Date of commencement of studies	· ·		Academic year of realisation of subject			2023/2024			
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific			
						research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	2		Language of instruction			Polish			
Semester of study	4		ECTS credits			2.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Department of Urban	Design and Re	egional Plannin	g -> Faculty of	Archite	cture			
Name and surname	Subject supervisor		prof. dr hab. Elżbieta Wojnicka-Sycz						
of lecturer (lecturers)	Teachers		prof. dr hab. Elżbieta Wojnicka-Sycz						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
	Number of study hours	15.0	15.0	0.0	0.0		0.0	30	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity	Participation in classes include plan		Participation in consultation hours		Self-study		SUM	
	Number of study hours 30		3.0		17.0		50		
Subject objectives	The aim of the course is to learn the specifics of the city's economy and its management.								
Learning outcomes	Course outcome Subject outcome Method of verification						fication		
	K6_U04		The student can analyze the economy of the city as an evolving and holistic system of many functions.			[SU5] Assessment of ability to present the results of task [SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment			
	[K6_W04] has basic knowledge in the field of pro-ecological design and knows the principles of sustainable development of cities and regions; has knowledge of the natural foundations of spatial management and the impact of natural conditions on the processes of economic development on a local, regional and national scale		The student understands the impact of natural conditions on the processes of economic development in local and regional systems			[SW2] Assessment of knowledge contained in presentation [SW1] Assessment of factual knowledge			
	[K6_W01] has knowledge related to theoretical and practical issues in the field of spatial management, the basics of planning and urban design and principles of local, regional and national development, and has basic knowledge about contemporary trends of development and revitalization of settlement structures and the life cycle of facilities and systems related to the functioning of settlement units		The student is able to analyze the problems and needs of the city's development and the resulting goals using project management tools.			[SW1] Assessment of factual knowledge [SW2] Assessment of knowledge contained in presentation [SW3] Assessment of knowledge contained in written work and projects
