

Subject card

| | | | | | | | |
|---|--|--|--|-------------------------------------|---------|--|-----|
| Subject name and code | Environmental Impact Assessment, PG_00049269 | | | | | | |
| Field of study | Spatial Development | | | | | | |
| Date of commencement of studies | October 2022 | | Academic year of realisation of subject | | | 2025/2026 | |
| Education level | first-cycle studies | | Subject group | | | Obligatory subject group in the field of study Subject group related to scientific research in the field of study | |
| Mode of study | Full-time studies | | Mode of delivery | | | at the university | |
| Year of study | 4 | | Language of instruction | | | Polish | |
| Semester of study | 7 | | ECTS credits | | | 2.0 | |
| Learning profile | general academic profile | | Assessment form | | | assessment | |
| Conducting unit | Department Of Urban Design And Regional Planning -> Faculty Of Architecture -> Wydziały Politechniki Gdańskie] | | | | | | |
| Name and surname of lecturer (lecturers) | Subject supervisor | | | | | | |
| | Teachers | | | | | | |
| Lesson types and methods of instruction | Lesson type | Lecture | Tutorial | Laboratory | Project | Seminar | SUM |
| | Number of study hours | 15.0 | 15.0 | 0.0 | 0.0 | 0.0 | 30 |
| | E-learning hours included: 0.0 | | | | | | |
| Learning activity and number of study hours | Learning activity | Participation in didactic classes included in study plan | | Participation in consultation hours | | Self-study | SUM |
| | Number of study hours | 30 | | 3.0 | | 17.0 | 50 |
| Subject objectives | The aim of the subject is to present the possibilities and potential of use Environmental Impact Assessment (EIA) procedure, obligatory in Polish law system in relation to some harmful activities, in spatial and urban planning. | | | | | | |
| Learning outcomes | Course outcome | | Subject outcome | | | Method of verification | |
| | [K6_U05] correctly interprets natural phenomena, and when formulating and solving engineering tasks related to spatial management, notices their systemic and non-technical aspects related to the natural environment | | The student is able to interpret natural conditions when planning engineering structures, noting their systemic and non-technical aspects. | | | [SU1] Assessment of task fulfilment | |
| | [K6_W04] has basic knowledge in the field of pro-ecological design and knows the principles of sustainable development of cities and regions; has knowledge of the natural foundations of spatial management and the impact of natural conditions on the processes of economic development on a local, regional and national scale | | Student possesses the basic knowledge on the environmental impacts of new activities in spatial development, and knows the impact of the environmental circumstances on the processes of spatial development | | | [SW1] Assessment of factual knowledge | |

| | | | |
|---------------------------------|--|-------------------|-------------------------------|
| Subject contents | <p>The EIA procedure is presented as a tool obligatory in Polish law during planning harmful activities, related to spatial planning and urban planning. EIA is presented as a fragment of Environmental assessments, including also strategic environmental assessment (SEA).</p> <p>Course content:</p> <ul style="list-style-type: none"> - EIA as a system helping spatial planning in sustainable development. - Genesis, theory, definitions, potential of EIA - EIA / SEA in relation to spatial planning - The phenomena and aims of EIA - Legal basis of EIA - Stages of EIA - The decision to undertake EIA - The sequence of environmental effects - Tools in EIA - Mitigation in EIA - EIA Report content - Case studies of controversial activities | | |
| Prerequisites and co-requisites | | | |
| Assessment methods and criteria | Subject passing criteria | Passing threshold | Percentage of the final grade |
| | exam | 60.0% | 80.0% |
| | participation | 70.0% | 20.0% |
