

Subject card

Subject name and code	Rural planning , PG_00049160						
Field of study	Spatial Development						
Date of commencement of studies	October 2022		Academic year of realisation of subject		2022/2023		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	2		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Environmental Design -> Faculty of Architecture						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. arch. Anna Górka				
	Teachers		dr hab. inż. arch. Anna Górka mgr inż. arch. Magdalena Szarejko				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	30.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		5.0		25.0	75
Subject objectives	The aim of the course is to provide knowledge about functional and cultural determinants of the rural areas management. Students acquire basic skills in planning the spatial development of a sustainable and resilient village.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K6_U04		takes stock of land use and development in rural areas; valorises the countryside's spatial resources; develops guidelines and makes conceptual sketches of rural spatial development plans		[SU1] Assessment of task fulfilment		
	[K6_W01] has knowledge related to theoretical and practical issues in the field of spatial management, the basics of planning and urban design and principles of local, regional and national development, and has basic knowledge about contemporary trends of development and revitalization of settlement structures and the life cycle of facilities and systems related to the functioning of settlement units		describes the conditions of development of rural and rural-urban areas; describes the historical development and features of the layout of selected forms of rural settlements; recognizes the diversity of the settlement system; knows the types of land use and land cover that are characteristic of rural area		[SW1] Assessment of factual knowledge		
	[K6_K01] critically evaluates the received content; Recognizes the importance of knowledge in solving cognitive and practical problems; it reflects on the ethical, scientific and social aspects related to the urban planner and planner's work		correctly formulates problems to be solved; looks for methods and tools for solving problems in an orderly manner; clearly presents its own solutions		[SK2] Assessment of progress of work		

Subject contents	Lectures		
	1. Issues of rural planning 2. Outline of the history and rural settlement development conditions 3. Contemporary problems of rural functioning and planning		
	Projects		
	1. Field and desk studies of the selected village 3. Record of visual impressions from the area 4. Identifying of the village spatial development stages 5. Inventory of the village land cover and use. Inventory of the village buildings 6. Valorization of spatial resources due to their importance for the sustainability and resilience of the rural environment and society 7.Panning concept of a sustainable village.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
		60.0%	25.0%
		100.0%	75.0%
