| Subject objectives | It is an introduction to the issues of shaping urban housing structures. The focus is on understanding the dual, socio-spatial nature of the housing environment, shaped in complex and changing conditions of its formation and functioning. The structure of the lectures and the related exercises makes it possible to learn about the most important issues of contemporary urban planning: the functioning of residential complexes of various sizes and locations, and to understand the principles of urban composition. | | | | | | |
