

## Subject card

Subject name and code	Engineering Graphics , PG_00018822						
Field of study	Chemistry in Construction Engineering						
Date of commencement of studies	October 2022		Academic year of realisation of subject		2023/2024		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	3		ECTS credits		2.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Chemical Apparatus and Theory of Machines -> Faculty of Chemistry						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Michał Ryms				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	30.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		4.0		16.0	50
Subject objectives	Mastering the use of technical drawing as a tool in the engineer's work.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
			Student is familiar with basic dimensioning guidelines and how to prepare technical drawings (working and assembly drawings). He is able to use computer-aided 2D and 3D design software at a basic level, allowing to prepare simple technical documentation. Student can also create simple construction diagrams with the help of such programs.		[SK4] Assessment of communication skills, including language correctness		
			Student is able recreate spatial elements on a drawing plane, using orthogonal and axonometric, as well as crosssection projections. He's familiar with basic dimensioning guidelines and how to prepare technical drawings (working and assembly drawings). He is able to use computer-aided 2D and 3D design software at a basic level, allowing to prepare simple technical documentation. Student can also create simple construction diagrams with the help of such programs.		[SU1] Assessment of task fulfilment		
	K6_U02				[SU1] Assessment of task fulfilment		

Subject contents	Program Content: Over the course of lectures, student familiarizes himself with methods of spatial element recreation in a the drawing plane, theory of engineering design recording and methods of computer-aided systems designing. The scope of program includes, in particular: - Introduction to the subject (formats, lines, scales, technical writing), - Methods of imaging three-dimensional objects on a drawing plane (object projections, finding the missing projection and isometric projections, cross-sections, revolved sections with dimensioning guidelines), - Working and assembly drawings preparation, - Disjoint connection drawings (screw joints, pipe threaded connections, bolts, fittings and elbows, thread protections against dismantling), - Drawings of permanent joints (welded, soldered and riveted joints), - Drawings of selected elements from heating and plumbing installation and armature (with emphasis on tanks, piping, valves, sight glasses, liquid level gauges and measuring points – different examples from construction industry). - Full installations projects (drawings). The course provides a gradual and fluent transition from drawing on paper to drawing in the CAD (Computer Aided Design) environment, in particular, with use of Autodesk AutoCAD software.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Midterm colloquium	60.0%	70.0%
	Project	60.0%	30.0%
Recommended reading	Basic literature	1. T. Dobrzański, Rysunek techniczny maszynowy, Wyd. WNT 2013,  2. W.M. Lewandowski, Maszynoznawstwo chemiczne, Gdańsk 1998, 3. M. Kochanowski, Zapis konstrukcji z geometrią wykreślną, Wyd. PG 2002, 4. K. Paprocki, Zasady zapisu konstrukcji, OWPW, Warszawa 2000, 5. A. Pikoń, AutoCAD 2011 PL - Pierwsze kroki, Wyd. Helion 2011 6.
