

## Subject card

Subject name and code	Telemedicine and Mobile Applications, PG_00049301						
Field of study	Biomedical Engineering						
Date of commencement of studies	October 2022		Academic year of realisation of subject		2025/2026		
Education level	first-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	4		Language of instruction		Polish		
Semester of study	7		ECTS credits		2.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Biomedical Engineering -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Mariusz Kaczmarek				
	Teachers		dr hab. inż. Mariusz Kaczmarek				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	15.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		2.0		3.0	50
Subject objectives	The aim of the course is to acquaint students with selected techniques and standards used in telemedicine as well as to develop gained to date knowledge of software programming to mobile devices, smartphone. An important objective is to show the specific need to ensure the integrity and safety of the analyzed and transmitted data. It is assumed that the reported content of education in this subject should encourage self-awareness utilizing available within the subject elements of distance education.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W03] Knows and understands, to an advanced extent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum		He can propose a hardware specification for a given set of issues.		[SU5] Assessment of ability to present the results of task		
	[K6_U07] can apply methods of process and function support, specific to the field of study		He can perform the risk analysis software solution and hardware.		[SW2] Assessment of knowledge contained in presentation [SU3] Assessment of ability to use knowledge gained from the subject		
	[K6_W54] Knows and understands, to an advanced extent, selected aspects of biomedical diagnostics		Is able to link causes with effects and propose appropriate diagnostic methods.		[SW1] Assessment of factual knowledge		

Subject contents	<ol style="list-style-type: none"><li>1. The objectives of telemedicine services.</li><li>2. Programs for telemedicine services in Poland and abroad.</li><li>3. The structure of the network and the availability of telemedicine services in Europe.</li><li>4. Exchange protocols and the protection of medical data HL7.</li><li>5. Exchange protocols and data protection of medical DICOM.</li><li>6. The structure and design of hospital information systems.</li><li>7. Integration of medical databases.</li><li>8. Systems for computer-aided diagnosis and therapy.</li><li>9. Techniques for video conferencing systems and video tele-consultations.</li><li>10. Interactive Web sites - in the prevention and e-learning.</li><li>11. Virtual systems in education and therapy.</li><li>12. Interactive Web sites - such as systems for self-hearing test (telediagnostyka I).</li><li>13. Interactive Web sites - such as systems for self-study eye (telediagnostyka II).</li><li>14. Mobile data synchronization.</li><li>15. Concepts of electronic systems, the patient and doctor.</li><li>16. Wireless transmission systems.</li><li>17. Systems design principles of biomedical sensor signals.</li><li>18. Exchange and remote evaluation of medical signals (ECG, and others).</li><li>19. Organization warning and response systems.</li><li>20. Standards intensive supervision system of the patient.</li><li>21. Database systems, mobile telemedicine.</li><li>22. Wireless standards used in biomedical monitoring (WiFi, Bluetooth, GPRS, mWLAN).</li><li>23. Mobile operating systems.</li><li>24. Software development platform for mobile devices such as: smartphone, PDA, iPod.</li><li>25. Programming mobile devices - Methods of authentication and access control.</li><li>26. Programming mobile devices to biosygnalów acquisition based on different operating systems.</li><li>27. Programming mobile devices - biosygnalów analysis.</li><li>28. Development trends of telemedicine services.</li><li>29. Intelligent expert systems in medical diagnostics.</li><li>30. Virtual reality in medical systems.</li></ol>														
Prerequisites and co-requisites	<p><b>Information Technology:</b></p> <ol style="list-style-type: none"><li>1. Launch an application<ol style="list-style-type: none"><li>1.1. Running applications from the command line (terminal)</li><li>1.2. Launching the application from the operating system GUI</li></ol></li><li>2. Computer Configuration<ol style="list-style-type: none"><li>2.1. Installing the software</li><li>2.2. Setting the environment variables</li></ol></li></ol> <p><b>Methods and techniques of programming:</b></p> <ol style="list-style-type: none"><li>1. The construction program in structured programming<ol style="list-style-type: none"><li>1.1. Variables, data types, functions</li><li>1.2. control Statements</li><li>1.3. Compilation and execution of programs</li><li>1.4. Basic data structures</li><li>1.5. The ability to move from ideas to the program by the algorithm</li></ol></li><li>2. Construction of the program in object-oriented programming<ol style="list-style-type: none"><li>2.1. Designing and writing classes</li><li>2.2. Creating and using objects</li><li>2.3. Elements of object-oriented paradigm (abstraction, encapsulation, inheritance, polymorphism)</li><li>2.4. Using class libraries</li></ol></li></ol> <p><b>Developing web applications in medicine:</b></p> <ol style="list-style-type: none"><li>1. Standards of medical information transfer</li><li>2. Standards in the conduct of medical records</li></ol>
