

Subject card

Subject name and code	District heating installations, PG_00055940						
Field of study	Power Engineering, Power Engineering, Power Engineering						
Date of commencement of studies	October 2022	Academic year of realisation of subject			2024/2025		
Education level	first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	6	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Zakład Systemów i Urządzeń Energetyki Ciepłej -> Institute of Energy -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Jacek Barański				
	Teachers		dr hab. inż. Jacek Barański				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	15.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	30	2.0	18.0	50		
Subject objectives	Present of knowledge and skills in the field of operation of municipal heat supply systems, including: medium-power heat source, heating network and heating substations.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_U08] can design the basic parameters of the selected technology related to energy conversion and select auxiliary devices and evaluate the project in terms of technical and economic	The student is able to design the basic parameters of the selected technology related to energy conversion and select auxiliary devices and assess the project in technical terms.			[SU3] Assessment of ability to use knowledge gained from the subject		
	[K6_U06] is able to use the basic knowledge on the operation of energy equipment in the field of thermal power plants, thermal and energy and heating systems, combustion engines, compressors and rotating machines to assess the technical condition of the system	The student is able to use the basic knowledge of the operation of power equipment in the field of thermal-energy and heating systems.			[SU3] Assessment of ability to use knowledge gained from the subject		
	[K6_W10] knows the basic installations in the field of renewable energy sources and their impact on the environment	The student knows the basic installations in the field of renewable energy sources and their impact on the environment.			[SW1] Assessment of factual knowledge		
Subject contents	Lecture: Overview of basic issues in the field of heating. Heat balance of the heating system. Heating plants. Heat systems. Thermal substations. Project: Heat losses in district heating installation. Calculation and heating node's elements selection.						

Prerequisites and co-requisites	Mathematics		
	Physics		
	Thermodynamics		
	Fluid mechanics		
	Heat transfer		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	project	56.0%	20.0%
	written test	56.0%	80.0%
Recommended reading	Basic literature	1. Bagiński Z., Amanowicz Ł., Ciepłownictwo. Projektowanie kotłowni i ciepłowni, Wydawnictwo Politechniki Poznańskiej 2018 2. Nantka M. B., Ogrzewnictwo i ciepłownictwo, tom I, Wyd. Politechniki Śląskiej, Gliwice 2013 3. Zaborowska E., Projektowanie kotłowni wodnych na paliwa ciekłe i gazowe, Wyd. Politechniki Gdańskiej 2018 4.
