

Subject card

Subject name and code	, PG_00056091						
Field of study	Mechanical and Medical Engineering						
Date of commencement of studies	October 2022		Academic year of realisation of subject		2024/2025		
Education level	first-cycle studies		Subject group				
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	6		ECTS credits		1.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Machine Design and Vehicles -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. inż. Michał Wasilczuk				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	5.0	0.0	10.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		0.0		0.0	15
Subject objectives	The main objective is to demonstrate on the examples of project activities, the effectiveness of different strategies to implement a design project depending on the actual conditions of their use, the second objective is to demonstrate the practical importance of the relationship product - the user, the object environment, function - technology form, in the process of new product development as well as the importance of the forms of communication. Critical analysis and interpretation of information, formulation of critical argumentation and tangible judgments of their own.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W07] he/she is able to design, manufacture and utilize machine parts and technical devices, he/she can prepare a technical documentation		not relevant		[SW1] Assessment of factual knowledge		
	[K6_U06] he/she has skills to work in industry and follow the rules of safety regulations, he/she is able to analyze basic economics problems to delineate the direction of solution by using engineering methods		not relevant		[SU2] Assessment of ability to analyse information		
	[K6_W13] he/she has knowledge related to application of engineering approaches in medicine or application of medical devices and rehabilitation devices		not relevant		[SW1] Assessment of factual knowledge		
	[K6_U08] he/she is able to assess whether proposed methods and tools can be used in practice to solve simple engineering task related to machine design, manufacturing and utilization		not relevant		[SU4] Assessment of ability to use methods and tools		
Subject contents	Lectures, presentations practical exercises and tasks that perpetuate gained knowledge, discussions.						
Prerequisites and co-requisites	no restrictions						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	on the basis of examination tes		50.0%		100.0%		

Recommended reading	Basic literature	Ginalski J., Liskiewicz M., Seweryn J., Developing a new product, ASP, Kraków 1995. Morris R., Product design PWN Warszawa 2009
	Supplementary literature	Kathryn Best, Design Management, PWN Warszawa 2009 Bochińska B., Ginalski J., Mamica Ł., Wojciechowska A., DM Design Management IWP Warszawa 2010 Brown T., Change by design. Libron Kraków 2013
	eResources addresses	Adresy na platformie eNauczanie:
Example issues/ example questions/ tasks being completed	Devise a concept of a device for rehabilitation	
Work placement	Not applicable
