GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Hydraulic Drive Control, PG_00055515		
Field of study	Mechanical Engineering		
Date of commencement of studies	October 2022	Academic year of realisation of subject	2024/2025
Education level	first-cycle studies	Subject group	Optional subject group Subject group related to scientific research in the field of study
Mode of study	Full-time studies	Mode of delivery	at the university
Year of study	3	Language of instruction	Polish
Semester of study	6	ECTS credits	5.0
Learning profile	general academic profile	Assessment form	exam
Conducting unit	Department of Mechanics and Mechatronics -> Faculty of Mechanical Engineering and Ship Technology		
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Paweł Śliwiński	
	Teachers		

Lesson types and methods of instruction

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	30.0	15.0	30.0	0.0	0.0	75

E-learning hours included: 0.0

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	75	5.0	45.0	125

Subject objectives

Knowlege of operation and design principles of hydrostatic and hydrodynamic drive and control systems. Knowledge of properties of system components.

Learning outcomes

Course outcome	Subject outcome	Method of verification
[K6_W08] possesses basic knowledge including the methodology of designing machine parts, mechanical devices, selection of construction materials, manufacturing and operation, with the lifetime cycle	has basic knowledge of the methodology of designing hydraulic systems	[SW1] Assessment of factual knowledge
[K6_U07] is able to design a typical construction of a mechanical device, component or a testing station using appropriate methods and tools, adhering to the set usage criteria	is able to design a typical hydraulic system of a mechanical device, component or test stand	[SU4] Assessment of ability to use methods and tools [SU3] Assessment of ability to use knowledge gained from the subject [SU2] Assessment of ability to analyse information [SU1] Assessment of task fulfilment
[K6_U05] is able to plant an experiment within the range of measuring the basic operating parameters of mechanical devices using a specialized equipment, interpret the results and reach the correct conclusions	is able to design a basic experiment in the field of measuring the basic operating parameters of a hydraulic device	[SU4] Assessment of ability to use methods and tools [SU3] Assessment of ability to use knowledge gained from the subject [SU2] Assessment of ability to analyse information

Subject contents	LECTURE:W1 (2h) throttling systemsW2 (2h) volumetric systemsW3 (2h) basic design calculations of the hydraulic systemW4 (2h) oil tanks and coolersW5 (2h) power supplies, pipelines, hoses, connections and couplingsW6-1 (1h) first start-up of the systemW6-2 (1h) liquid purityW6-3-(1h) liquid filtration and system rinsingW7 (2h) system with proportional distributor, proportional valvesW8 (2h) hydraulic servo driveW9 (2h) Load Sensing systemsW10 (2h) power recovery systemsW11-2 (1h) pumps for open systems and pump controllersW12-1 (1h) closed systemsW12-2 (1h) pumps and motors for closed systemsW13 (2h) logical elements, lift valvesW14 (2h) selected vehicle drive systemsW15 (2h) repetition of the material LABORATORIES:L1 System with a throttle valve and system with a flow regulatorL2 Determination of the cavitation characteristics of the pumpL3 Determining the characteristics of a hydraulic motorL4 Determining the characteristics of a proportional distributorL5 Sequential control (including electric) of actuatorsL6 Testing the hydrostatic transmissionL7 Testing the actuator, determining the friction forces in the actuatorL8 Actuator differential connectionL9 Hydraulic accumulatorsL10 Measurement of liquid contaminationL11 Measurement of liquid viscosityL12 Air in oilL13 Pumping units (power supplies) and liquid tanksL14 Pipelines, hoses, connections and couplingsL15 Make-up examination
Prerequisites and co-requisites	Hydraulics and pneumatics
Assessment methods and criteria	

Subject passing criteria	Passing threshold	Percentage of the final grade
excesises	56.0%	15.0%
laboratory	56.0%	15.0%
test after lecture	56.0%	70.0%
