

## Subject card

| Subject name and code                       | Fundamentals of Machine Design II, PG_00050280  |  |   |                                     |        |   |         |     |  |
|---|---|--|---|-------------------------------------|--------|---|---------|-----|--|
| Field of study                              | Mechanical Engineering  |  |   |                                     |        |   |         |     |  |
| Date of commencement of studies             | October 2022  |  | Academic year of realisation of subject |                                     |        | 2023/2024   |         |     |  |
| Education level                             | first-cycle studies   |  | Subject group                           |                                     |        | Obligatory subject group in the field of study Subject group related to scientific research in the field of study |         |     |  |
| Mode of study                               | Full-time studies   |  | Mode of delivery                        |                                     |        | at the university   |         |     |  |
| Year of study                               | 2   |  | Language of instruction                 |                                     |        | English   |         |     |  |
| Semester of study                           | 4   |  | ECTS credits                            |                                     |        | 8.0   | 8.0     |     |  |
| Learning profile                            | general academic profile  |  | Assessment form                         |                                     |        | exam  |         |     |  |
| Conducting unit                             | Department of Machine Design and Vehicles -> Faculty of Mechanical Engineering and Ship Technology  |  |   |                                     |        |   |         |     |  |
| Name and surname of lecturer (lecturers)    | Subject supervisor  |  | dr inż. Grzegorz Rotta                  |                                     |        |   |         |     |  |
|   | Teachers  |  | dr inż. Grzegorz Rotta                  |                                     |        |   |         |     |  |
| Lesson types and methods of instruction     | Lesson type   | Lecture  | Tutorial                                | Laboratory                          | Projec | :t  | Seminar | SUM |  |
|   | Number of study hours   | 30.0   | 30.0                                    | 0.0                                 | 30.0   |   | 0.0     | 90  |  |
|   | E-learning hours included: 0.0  |  |   |                                     |        |   |         |     |  |
| Learning activity and number of study hours | Learning activity   | Participation in didactic classes included in study plan |   | Participation in consultation hours |        | Self-study  |         | SUM |  |
|   | Number of study hours   | 90   |   | 8.0                                 |        | 102.0   |         | 200 |  |
| Subject objectives                          | Presentation of the general theoretical foundations (features, functions, constructional variants, application, etc.) regarding typical groups of machine parts, such as: screw joints, welded joints, shafts and axles, couplings, gears, brakes, bearings, drives, flexible elements.  Acquainted with the basic calculation methods of typical machine elements and how to select catalog parts for the designed technical device  Learning to create technical documentation effectively using theoretical knowledge and CAD software |  |   |                                     |        |   |         |     |  |

Data wydruku: 27.04.2024 04:14 Strona 1 z 3

| Learning outcomes               | Course outcome   | Subject outcome  | Method of verification   |  |  |  |  |
|---------------------------------|--|--|--|--|--|--|--|
|                                 | K6_W04   | Possesses knowledge on mechanics, including the processes of modelling mechanical systems, statics, kinematics and dynamics of rigid objects and basic knowledge on vibrations   | [SW1] Assessment of factual knowledge  |  |  |  |  |
|                                 | K6_U11   | Is able to analyse the operation of devices and compare the construction solutions applying usage, safety, environmental, economic and legal criteria  | [SU4] Assessment of ability to<br>use methods and tools<br>[SU2] Assessment of ability to<br>analyse information |  |  |  |  |
|                                 | [K6_U03] is able to identify, formulate and develop the documentation of a simple design or technological task, including the description of the results of this task in Polish or in a foreign language and to present the results using computer software or other aiding tools  | Is able to identify, formulate and develop the documentation of a simple design or technological task, including the description of the results of this task in Polish or in a foreign language and to present the results using computer software or other aiding tools | [SU1] Assessment of task fulfilment  |  |  |  |  |
|                                 | K6_U07   | Is able to design a typical construction of a mechanical device, component or a testing station using appropriate methods and tools, adhering to the set usage criteria  | [SU1] Assessment of task fulfilment  |  |  |  |  |
|                                 | K6_W08   | Possesses basic knowledge including the methodology of designing machine parts, mechanical devices, selection of construction materials, manufacturing and operation, with the lifetime cycle  | [SW1] Assessment of factual knowledge  |  |  |  |  |
|                                 | Presentation of the general theoretical foundations (features, functions, constructional variants, applic etc.) regarding typical groups of machine parts, such as: screw joints, welded joints, shafts and axles, couplings, gears, brakes, bearings, drives, flexible elements. Acquainted with the basic calculation me of typical machine elements |  |  |  |  |  |  |
| Prerequisites and co-requisites | Basic knowledge of mechanics, strength of materials, technical drawing, materials science and any CAD program  |  |  |  |  |  |  |
| Assessment methods              | Subject passing criteria   | Passing threshold  | Percentage of the final grade  |  |  |  |  |
| and criteria                    | Design projects  | 56.0%  | 30.0%  |  |  |  |  |
|                                 | Tests  | 56.0%  | 30.0%  |  |  |  |  |
|                                 | Final exam   | 56.0%  | 40.0%  |  |  |  |  |
| Recommended reading             | Basic literature  A set of scripts from the Basics of Machine Design published by the Gdańsk University of Technology  |  |  |  |  |  |  |
|                                 | Supplementary literature - A set of books "Basics of Machine Design" published by P' Warsaw  |  |  |  |  |  |  |
|                                 |  | ,  | , II, III" edited by M. Dietrich, PWN, Warsaw  |  |  |  |  |
|                                 |  | - Any works on the "Basics of Machine Design" in Polish and English  |  |  |  |  |  |
|                                 | eResources addresses   | Adresy na platformie eNauczanie: Fundamentals of Machine Design II, PG_00050280, DaPE, sem. letni, 2023/24 - Moodle ID: 37599 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=37599   |  |  |  |  |  |
