

## Subject card

Subject name and code	Welding Technology, PG_00040187						
Field of study	Mechanical Engineering						
Date of commencement of studies	October 2022	Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			English		
Semester of study	4	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Materials Engineering and Bonding -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Aleksandra Świerczyńska					
	Teachers	dr hab. inż. Jacek Tomków					
		dr inż. Aleksandra Świerczyńska					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	30	6.0		39.0		75
Subject objectives	Presentation of the basics of welding technology of metals.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	K6_W03	The student knows the basic methods of joining metals.			[SW1] Assessment of factual knowledge		
	K6_U10	The student is able to independently assess the suitability of the welding method for a given application.			[SU3] Assessment of ability to use knowledge gained from the subject		
Subject contents	<p>Classification of welding and joining processes. Outline of welding thermal cycles. Phase transformations in the weld and heat affected zone. Definition of weldability. Basic and supplementary materials for welding. Basics of welding technology specification.</p> <p>Gas welding. Manual arc welding (MMA). Submerged arc welding under flux. TIG welding. Shielding gases. Gas-shielded arc welding MIG / MAG methods. Flux cored arc welding. Pulse arc welding. Laser welding, plasma and electron beam welding.</p> <p>Resistance pressure welding, spot and linear pressure welding, upset and flash welding. Basic parameters of the process. Other methods of pressure welding.</p> <p>Thermal cutting methods: oxygen cutting, plasma cutting. Cutting laser beam. Deformation and welding stress and methods for their reduction. Inspection of welded joints, imperfections definitions and methods for their detection.</p> <p>LABORATORY</p> <p>Manual arc welding with coated electrodes, automatic submerged arc welding. Gas-shielded arc welding. Pressure resistance welding. Gas welding and cutting. Structure of welded joints. Imperfections of welded joints</p>						
Prerequisites and co-requisites	Fundamentals of Materials Science						
Assessment methods and criteria	Subject passing criteria	Passing threshold			Percentage of the final grade		
	Written test	56.0%			80.0%		
	Laboratory short tests	56.0%			20.0%
