

Subject card

Subject name and code	Essentials of Automatics, PG_00055418						
Field of study	Mechatronics						
Date of commencement of studies	October 2022	Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	4	ECTS credits			5.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Department of Mechanics and Mechatronics -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Rafał Hein					
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	15.0	15.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	60	8.0		57.0		125
Subject objectives	Presentation of the fundamental issues related to automatic control systems. Knowing the structure and components of a typical control system. Gaining general information about the methods of designing, analysis and study of the properties of typical control systems.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_U02] is able to elaborate on specific mechatronic topics as well as topics from engineering and technical sciences and disciplines such as Mechanical Engineering, Automation, Electronics and Electrical Engineering	Student can distinguish between open and closed loop control system. He knows the basic concepts and nomenclature used to describe automation systems. Is able to develop and design an automation facility control system.			[SU1] Assessment of task fulfilment		
	[K6_W10] has a basic knowledge about development trends in terms of engineering and technical sciences and scientific disciplines: Mechanical Engineering, Automation, Electronics and Electrical Engineering, adequate for Mechatronics course	He knows the trends in the development of theoretical methods as well as practical technologies used in automation and control theory.			[SW1] Assessment of factual knowledge		
	[K6_U04] is able to utilise known methods and mathematical models as well as analog and digital measurement methods for analysing and assesement of stationary continous and discrete mechatronics systems and processes	Student can identify the basic elements of control systems. He is able to design basic feedback control systems.			[SU1] Assessment of task fulfilment		
	[K6_W03] has organized and theoretically supported knowledge in terms of automation and control theory of stationary , continuous and discrete mechatronic systems, mechatronic design, developments and exploitation of mechatronic systems	Student has a fundamental knowledge about control systems. He knows the structure of a typical automation systems. He can describe signals and analyze them in the time and frequency domain. He is able to identify and characterize typical dynamic elements. He has practical skills to design and select the parameters of control systems.			[SW1] Assessment of factual knowledge		

Subject contents	<p>Lecture</p> <p>Introduction. Control system structure. Classification of control elements. Block diagrams and block diagram algebra. Classification of control systems. Open and closed loop feedback control systems. Properties of the feedback control systems. Signals. Standard signals. Mathematical description of signals and control systems. Laplace transformation and its application. The concept of transfer function. Static characteristics of automation systems. Dynamic time characteristics. Determination of step and impulse responses. Frequency analysis. Dynamic frequency characteristics. Drawing Nyquist and Bode charts. Basic components of control systems. Classification, description, characteristics and examples of typical control system components: proportional, integral, derivative, delay, first and second order systems. Controllers. PID controller - construction, structure, characteristics. Concept of stability. Stability of control systems. Conditions for stability. Algebraic (Hurwitz, Routh) and graphic (Nyquist) criteria of stability. Stability margin.</p> <p>Classes</p> <p>Application of the Laplace transform in solving differential equations. Signals description in the time domain and determination of their Laplace transform. Determination of transfer function for systems with different physical nature. Rules and block diagram reduction. Determination of time responses of systems with a given transfer function. Preparation of frequency characteristics of Bode and Nyquist. Research on the stability of control systems based on algebraic (Hurwitz, Routh) and graphical (Nyquist) criteria. Determining of stability margin. Choice of the type and controller parameters. Designing and analysis of simple continuous control systems.</p> <p>Laboratory</p> <p>Design and analysis of combinational logic systems. Simulation and analysis of control systems in the Matlab & Simulink package. Determination of static and dynamic (time and frequency) characteristics of selected physical systems. Investigation of temperature control system with PID controller. Investigation of electromechanical servomechanism.</p>														
Prerequisites and co-requisites	Mathematics, Physics, Mechanics														
Assessment methods and criteria	<table border="1" data-bbox="448 1068 1487 1234"> <thead> <tr> <th data-bbox="448 1068 798 1106">Subject passing criteria</th> <th data-bbox="802 1068 1142 1106">Passing threshold</th> <th data-bbox="1147 1068 1487 1106">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="448 1113 798 1142">Midterm colloquium</td> <td data-bbox="802 1113 1142 1142">50.0%</td> <td data-bbox="1147 1113 1487 1142">30.0%</td> </tr> <tr> <td data-bbox="448 1149 798 1196">Laboratory (reports from laboratory exercises)</td> <td data-bbox="802 1149 1142 1196">100.0%</td> <td data-bbox="1147 1149 1487 1196">30.0%</td> </tr> <tr> <td data-bbox="448 1202 798 1234">Written exam</td> <td data-bbox="802 1202 1142 1234">50.0%</td> <td data-bbox="1147 1202 1487 1234">40.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Midterm colloquium	50.0%	30.0%	Laboratory (reports from laboratory exercises)	100.0%	30.0%	Written exam	50.0%	40.0%
