

Subject card

Subject name and code	Materials science in welding, PG_00055248						
Field of study	Management and Production Engineering						
Date of commencement of studies	October 2022	Academic year of realisation of subject			2024/2025		
Education level	first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	6	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Institute of Manufacturing and Materials Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Dariusz Fydrych				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	15.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		4.0		26.0	75
Subject objectives	The aim of the course is to provide the students with knowledge of weldability of materials						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_K01] feels the need for self-realization by learning throughout life, is looking for modern and innovative solutions in their actions, is able to think creatively and act in an entrepreneurial way		Student can choose the method of joining (welding, resistance welding, soldering, brazing) for a group of materials, properties of estimate and develop the technical specifications		[SK1] Assessment of group work skills [SK5] Assessment of ability to solve problems that arise in practice [SK4] Assessment of communication skills, including language correctness [SK3] Assessment of ability to organize work		
	[K6_W02] has knowledge of materials, their properties and research methods, including construction materials used in the machinery industry, has ordered, theoretically founded knowledge of mechanics including modeling of mechanical systems in the field of statics, kinematics and dynamics, and has an ordered, theoretically founded knowledge in the field of strength analysis materials and products		Student recognizes structural materials and their operating properties		[SW3] Assessment of knowledge contained in written work and projects [SW1] Assessment of factual knowledge		
	[K6_U02] has the ability of self-learning and expanding knowledge in a specialized field of engineering production		The student has knowledge of the directions of development of machine construction		[SU4] Assessment of ability to use methods and tools [SU3] Assessment of ability to use knowledge gained from the subject		

Subject contents	<p>LECTURE</p> <p>Weldability. The phenomena of cracking during the welding process. Hot, cold, lamellar and reheat cracks. Weldability of alloy steels. Characteristics of consumables. Thermal field, thermal cycle. Crystallization of the weld metal. Metallurgical reactions and slag properties. Design of the weld metal. Heat affected zone. CTP and CTPcs charts. The concept of $t/5$. Weldability of ferrous and nonferrous alloys.</p> <p>LABORATORY</p> <p>Determination of susceptibility of steel to hot and cold cracking. Evaluation of weldability of mild and high alloyed steels. Determination of diffusible hydrogen content in deposited metal.</p>											
Prerequisites and co-requisites	MetallographyMathematicsChemistryPhysicsWelding and joining processes											
Assessment methods and criteria	<table border="1" data-bbox="451 577 1487 683"> <thead> <tr> <th data-bbox="451 577 794 611">Subject passing criteria</th> <th data-bbox="794 577 1141 611">Passing threshold</th> <th data-bbox="1141 577 1487 611">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="451 611 794 645">laboratory test</td> <td data-bbox="794 611 1141 645">60.0%</td> <td data-bbox="1141 611 1487 645">40.0%</td> </tr> <tr> <td data-bbox="451 645 794 683">test</td> <td data-bbox="794 645 1141 683">60.0%</td> <td data-bbox="1141 645 1487 683">60.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	laboratory test	60.0%	40.0%	test	60.0%	60.0%
Subject passing criteria	Passing threshold	Percentage of the final grade										
laboratory test	60.0%	40.0%										
test	60.0%	60.0%
