

Subject card

Subject name and code	FINANCIAL MATHEMATICS, PG_00058400						
Field of study	Economics						
Date of commencement of studies	October 2022	Academic year of realisation of subject			2022/2023		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Economic Analysis and Finance -> Faculty of Management and Economics						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Marcin Potrykus					
	Teachers	dr Piotr Kasprzak dr inż. Marcin Potrykus					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	30.0	0.0	0.0	0.0	45
	E-learning hours included: 0.0						
Matematyka finansowa ST - sem. lato r. ak. 2022/2023 - Moodle ID: 17629 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=17629							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	45	10.0	45.0	100		
Subject objectives	Identifies mathematical concepts and mathematical tools used in finance and banking						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_W02] demonstrates comprehensive preparation in the field of methods, techniques for formulating and solving problems	selects appropriate methods and mathematical techniques to analyse financial problems			[SW1] Assessment of factual knowledge		
Subject contents	[K6_U04] formulates logical solutions to complex or unstructured problems	analyzes the influence of various factors which influence the studied phenomenon, striving to obtain an optimal solution			[SU2] Assessment of ability to analyse information		
	Time value of money - introduction. Simple interest model (SIM), Capital Gains Tax. Compound interest model (CIM) with annual, sub-period and continuous capitalization. The calculation of the mathematical and commercial discount. Valuation of short-term securities. Real capital value, real interest rate. The basis for building an investment portfolio. Annuities - without capitalization, with capitalization, equal, compatible and non-compatible. Construction of the loan repayment schedule, APRC calculation. Valuation of long-term securities. Introduction to the valuation of derivatives using the example of options.						
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria	Passing threshold			Percentage of the final grade		
	Additional tasks	0.0%			10.0%		
	Midterm colloquium	60.0%			60.0%		
	Final test	60.0%			30.0%
