

Subject card

Subject name and code	Chemistry of nanomaterials, PG_00052075						
Field of study	Nanotechnology						
Date of commencement of studies	October 2022		Academic year of realisation of subject		2023/2024		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	4		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department Of Inorganic Chemistry -> Faculty Of Chemistry -> Wydziały Politechniki Gdańskiej						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Andrzej Okuniewski				
	Teachers		dr inż. Andrzej Okuniewski				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	15.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		5.0		50.0	100
Subject objectives	The aim of the course is to familiarize students with various types of nanomaterials with particular emphasis on chemical aspects, i.e. their synthesis, modification methods, properties and application.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K6_W06		has knowledge of the synthesis and methods of chemical modification of nanomaterials; can explain the influence of structure on the physical and chemical properties of nanomaterials; for selected examples knows how to propose a modification method leading to the desired properties		[SW1] Assessment of factual knowledge		
	K6_K05		knows how to prepare a multimedia presentation based on information from a scientific article and present it in a manner analogous to a conference presentation (specific criteria as to the content and duration of the presentation)		[SK4] Assessment of communication skills, including language correctness		
	K6_U01		knows how to search scientific journals in the field of nanotechnology and use the information contained therein (in English)		[SU2] Assessment of ability to analyse information		
	K6_W05		knows the basic concepts of inorganic, organic and physical chemistry related to nanotechnology		[SW1] Assessment of factual knowledge		
	K6_U08		is able to analyze the material contained in a scientific article, interpret and translate it so that it is understandable for a group of students		[SU5] Assessment of ability to present the results of task		

Subject contents	<p>Lectures: Obtaining nanostructures of various dimensions based on metallic, ceramic, semiconductor, magnetic, polymer and hybrid materials. Research and prediction of the structure and properties of nanomaterials. Surface modification methods. Elements of coordination and supramolecular chemistry. The influence of structure on the properties of nanomaterials. Examples of the use of nanomaterials in science, medicine and everyday life. Calculation exercises.</p> <p>Seminars: Students prepare individual presentations (along with a multimedia presentation) based on scientific articles published in last year's issue of the Nanotechnology journal.</p> <p>The detailed program of the lecture and seminars is available on the "eNauczanie" platform.</p>											
Prerequisites and co-requisites												
Assessment methods and criteria	<table><tr><th>Subject passing criteria</th><th>Passing threshold</th><th>Percentage of the final grade</th></tr><tr><td>assessment</td><td>60.0%</td><td>60.0%</td></tr><tr><td>seminars</td><td>60.0%</td><td>40.0%</td></tr></table>	Subject passing criteria	Passing threshold	Percentage of the final grade	assessment	60.0%	60.0%	seminars	60.0%	40.0%		
Subject passing criteria	Passing threshold	Percentage of the final grade										
assessment	60.0%	60.0%										
seminars	60.0%	40.0%
