

Subject card

Subject name and code	Computer modeling and design of nanomaterials, PG_00055528						
Field of study	Nanotechnology						
Date of commencement of studies	October 2022	Academic year of realisation of subject			2023/2024		
Education level	second-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			5.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Zakład Magnetycznych Właściwości Materiałów -> Instytut Nanotechnologii i Inżynierii Materiałowej -> Faculty of Applied Physics and Mathematics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Marek Augustyniak				
	Teachers		dr inż. Marek Augustyniak				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	45.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		5.0		60.0	125
Subject objectives	<p>The class is supposed to guide students in practical skills related to the computer-aided design. The choice of tools is based on the desire to provide solutions as versatile as possible. In particular, the student shall be helped with:</p> <ul style="list-style-type: none">- understanding and creating standard paper product documentation (CAD 2D)- understanding the specifics of 3D design, based on at least one of the currently popular programs (Fusion)- application of engineering simulation methods, primarily based on the FEA (free Salome pre-processor, ANSYS computing system)						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	K7_U06	Some classes (ANSYS or a similar program) provide the opportunity for various simulations.	[SU4] Assessment of ability to use methods and tools
	K7_W05	These classes have elements of nanotechnology (e.g. simplified modeling of a nanotube), while most of the proposed tools and methods apply to the millimeter scale and higher.	[SW2] Assessment of knowledge contained in presentation
	K7_K04	The student tries to complete all tasks, including those with a higher degree of difficulty.	[SK2] Assessment of progress of work
	K7_W02	These classes have elements of nanotechnology (e.g. simplified modeling of a nanotube), while most of the proposed tools and methods apply to the millimeter scale and higher.	[SW2] Assessment of knowledge contained in presentation
	K7_U03	The student knows the commands of CAD 2D; he/she is able to use software such as OnShape or Fusion 360, Salome, Ansys.	[SU4] Assessment of ability to use methods and tools
Subject contents	<p>AutoCAD or equivalent program, e.g. LibreCAD: interface basics, commands, 2D exercises.</p> <p>ANSYS or equivalent program: physics simulation of single parts (mechanics, heat transfer, optional electromagnetism) - comparison with analytical solutions and experiment, where possible</p> <p>SALOME + Calculix - free software for 3D modeling and FEM calculations</p> <p>OnShape - a CAD 3D software with several extensions, which currently gains on popularity on the engineering design market</p>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Completing design tasks	70.0%	50.0%
	Student participation intensity	80.0%	50.0%
Recommended reading	Basic literature	Software manuals (PDF, online training courses)	
	Supplementary literature	----	
	eResources addresses	Adresy na platformie eNauzanie: Computer design of materials 202324 - Moodle ID: 32618 https://enauzanie.pg.edu.pl/moodle/course/view.php?id=32618	
Example issues/ example questions/ tasks being completed	<p>CAD 2D: Apartment drafting</p> <p>OnShape: Designing a Simple Part or an assembly from Scratch</p> <p>Salome + Calculix: simple part vibration calculation; work with models from the GrabCAD portal</p> <p>ANSYS: prediction of the durability of the car towbar</p>		
Work placement	The acquired skills are directly applicable in industry.
