

Subject card

Subject name and code	Software Engineering, PG_00044135						
Field of study	Mathematics						
Date of commencement of studies	October 2022	Academic year of realisation of subject			2022/2023		
Education level	second-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Differential Equations and Mathematical Applications -> Faculty of Applied Physics and Mathematics						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. Paweł Pilarczyk					
	Teachers	dr hab. Paweł Pilarczyk					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	15.0	15.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	60	5.0		35.0		100
Subject objectives	Becoming familiar with basic methods of software engineering and acquiring the ability to apply these methods in practice. This concerns group work on a large scale IT project at all the stages of software production: beginning with requirements engineering, through requirements analysis, software design, implementation, testing, installation, to the stage of software maintenance. Also getting acquainted with basic issues regarding IT project management, such as quality management.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	K7_U13	Can design and create software that satisfies given requirements.			[SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment		
	K7_W08	Knows software engineering methods for designing, creating, testing and maintaining software.			[SW3] Assessment of knowledge contained in written work and projects [SW2] Assessment of knowledge contained in presentation		
	K7_K03	Describes selected software development processes (such as waterfall, iterative, agile). Can develop software in a team. Is able to conduct requirements solicitation, requirements analysis, and to design software. Can use UML to model selected aspects of software. Knows and understands ethics code of a software engineer.			[SK1] Assessment of group work skills [SK5] Assessment of ability to solve problems that arise in practice [SK4] Assessment of communication skills, including language correctness [SK3] Assessment of ability to organize work		
K7_W11	Knows how to proceed with software design and development.			[SW3] Assessment of knowledge contained in written work and projects [SW1] Assessment of factual knowledge			

Subject contents	<p>Lecture: Introduction to software engineering. Ethics code. Software development processes. Requirements engineering. Structural and object-oriented methods. Using the UML in modelling. Testing software. IT project management, quality management. Software maintenance. Critical systems. Agile Manifesto and agile methods, including Scrum.</p> <p>Lab and project: Applying the software engineering methods to designing specific software, including preparation of UML diagrams and user stories. Practical development of software prototypes.</p>		
Prerequisites and co-requisites	Basic ability to write computer programs, e.g. in Python, C, or HTML/JavaScript.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	quizzes (in writing, 10 minutes each)	60.0%	50.0%
	homework, project, presentations, etc.	60.0%	50.0%
Recommended reading	Basic literature	<p>Krzysztof Sacha, Inżynieria oprogramowania, PWN 2010.</p> <p>Mariusz Chrapko, Scrum. O zwinnym zarządzaniu projektami. Wydanie II rozszerzone, Helion 2014.</p>	
	Supplementary literature	<p>Ian Sommerville, Inżynieria oprogramowania, WNT 2003.</p> <p>Roger S. Pressman, Praktyczne podejście do inżynierii oprogramowania, WNT 2004.</p> <p>Russ Miles, Kim Hamilton, UML 2.0. Wprowadzenie, Helion 2007.</p>	
	eResources addresses	<p>Adresy na platformie eNauczanie:</p> <p>Inżynieria oprogramowania 2023 - Moodle ID: 24895 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=24895</p>	
Example issues/ example questions/ tasks being completed	<p>Requirements engineering.</p> <p>Software development processes.</p> <p>Verification and validation.</p> <p>Agile methods and the Manifesto.</p> <p>Ethics code of a software engineer.</p> <p>The INVEST features of user stories.</p>		
Work placement	Not applicable
