

## Subject card

Subject name and code	Stochastic integral, PG_00021509						
Field of study	Mathematics						
Date of commencement of studies	October 2022		Academic year of realisation of subject		2022/2023		
Education level	second-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	2		ECTS credits		5.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Department of Nonlinear Analysis and Statistics -> Faculty of Applied Physics and Mathematics						
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. inż. Tomasz Szarek				
	Teachers		dr Wojciech Czernous				
			prof. dr hab. inż. Tomasz Szarek				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	30.0	0.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		5.0		60.0	125
Subject objectives	Main aim is to equip the student is advanced mathematical tools in technical subjects.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K7_W02		Students knows the constructions of stochastic integrals and can recognize the difference among them.		[SW1] Assessment of factual knowledge		
	K7_W04		Student knows advanced theorems of stochastic integral.		[SW1] Assessment of factual knowledge		
	K7_U10		Student can proved the existence of thestochastic integral and can count it applying basic theorems of stochstic integrations		[SU4] Assessment of ability to use methods and tools		
	K7_K03		Students can solve problems of stochastic integrations in groups.		[SK1] Assessment of group work skills		
	K7_U06		Student can proved the existence of thestochastic integral and can count it applying basic theorems of stochstic integrations		[SU4] Assessment of ability to use methods and tools		
Subject contents	Probability spaces with filtraation. Stochastic basis. Stoping times and their basic properties. Classyfication of stoping times. Optional i prognose sigam-algebras. Increasin processes, processes with finite variation and processes with integrable variation. Localization. martingales with continuous time. and their basic properties. The Doob-Meyer decomposition. Square integrable martingales. Stochastic integral with respect to local martingales with continuous paths.and their basic properties. Ito's formula and it applications.. The Girsanov theorem. The decomposition of lokal martingales. Stochastic integral with respect to local martingales and semimartingales.						
Prerequisites and co-requisites	Probability theory, measure theory and functional analysis.						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	Colloquium 1		51.0%		20.0%		
	Exam		51.0%		60.0%		
	Colloquium 2		51.0%		20.0%		

Recommended reading	Basic literature	<p>1) R. Elliot: Stochastic calculus and applications, Springer 1982.</p> <p>2) H. Kuo, Introduction to stochastic integration, Springer 2006.</p>
	Supplementary literature	<p>1) C. Dillecherie, P..A. Meyer, Probabilities and potential, tom 2., North-Holland 1982..</p> <p>2) P. Protter, Stochastic Integration and differential equations, Springer 1990.</p> <p>3) O. Kallenberg, Foundations of modern probability, Springer 2001.</p> <p>4) Sheng-wu He, Jia-gang Wang, Jia-an Yan, Semimartingale theory and stochastic calculus, Science Press, New York 1992.</p>
	eResources addresses	<p>Adresy na platformie eNauczenie:</p> <p>Całka stochastyczna - Moodle ID: 31019</p> <p><a href="https://enauczenie.pg.edu.pl/moodle/course/view.php?id=31019">https://enauczenie.pg.edu.pl/moodle/course/view.php?id=31019</a></p>
Example issues/ example questions/ tasks being completed	<p>Discuss the construction of stochastic integrals with respect to local martingales with continuous paths.</p> <p>Give the general stopping theorem.</p> <p>Give the Ito formula and proved it.</p>	
Work placement	Not applicable
