

Subject card

Subject name and code	DATABASES, PG_00058505						
Field of study	Economic Analytics						
Date of commencement of studies	October 2022	Academic year of realisation of subject				2023/2024	
Education level	first-cycle studies	Subject group				Obligatory subject group in the field of study Subject group related to scientific research in the field of study	
Mode of study	Full-time studies	Mode of delivery				at the university	
Year of study	2	Language of instruction				Polish	
Semester of study	3	ECTS credits				4.0	
Learning profile	general academic profile	Assessment form				assessment	
Conducting unit	Department of Informatics in Management -> Faculty of Management and Economics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Bartosz Woliński				
	Teachers		dr inż. Bartosz Woliński				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	30.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	45	10.0		45.0		100
Subject objectives	Designs and implements databases in accordance with theoretical and practical rules						
Learning outcomes	Course outcome		Subject outcome			Method of verification	
	[K6_W02] demonstrates comprehensive preparation in the field of methods, techniques for formulating and solving problems		applies the principles of requirements modeling and IT system design to create databases			[SW3] Assessment of knowledge contained in written work and projects	
	[K6_U07] uses information technologies to improve data analysis and decision-making processes		implements databases based on defined requirements			[SU1] Assessment of task fulfilment [SU4] Assessment of ability to use methods and tools	
Subject contents	<p>Designing an information system. Place the design in the life cycle of the system. The methodology for designing and modeling. Designing databases as part of management information systems.</p> <p>Engineering requirements.</p> <p>Identification of processes and functions (analysis of function).</p> <p>The logical process model.</p> <p>Modeling the flow of information.</p> <p>Data modeling.</p> <p>The logical data model based on "case study."</p> <p>Optimizing data model.</p> <p>The physical data model.</p> <p>Modeling Interface.</p> <p>Process model stages.</p> <p>Using CASE tools, database schema generation.</p> <p>RDBMS MS SQL Server use to create databases.</p> <p>Design of input and output.</p> <p>Advanced SQL (structured query language) used for creating, modifying databases, and to place and retrieve data from databases.</p>						
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria		Passing threshold			Percentage of the final grade	
	Final test		75.0%			10.0%	
	Practical exercise		80.0%			30.0%	
	Project		60.0%			60.0%
