GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Pumps and Compressors, PG_00045073
Field of study	Ocean Engineering, Ocean Engineering

Date of commencement of studies	October 2020	Academic year of realisation of subject	2022/2023
Education level	first-cycle studies	Subject group	
Mode of study	Full-time studies	Mode of delivery	at the university
Year of study	3	Language of instruction	Polish
Semester of study	5	ECTS credits	4.0
Learning profile	general academic profile	Assessment form	assessment

Conducting unit	Faculty of Ocean Engineering and Ship Technology

Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Damian Bocheński
	Teachers	dr hab. inż. Damian Bocheński mgr inż. Dominik Kreft

Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	15.0	0.0	0.0	0.0	45
	E-learning hours included: 0.0						
	Address on the e-learning platform: https://enauczanie.pg.edu.pl/moodle/course/view.php?id=19159						

Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
	Number of study hours	45	6.0	44.0	95

Subject objectives	To acquaint students with the principles of designing and operating pumping (and compressor) installations

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K6_U05] can formulate a simple engineering task and its specification within the range of design, construction and operation of ocean technology objects and systems	The student designs pipeline installations. It determines the basic parameters characterizing the pipeline installation. Selects appropriate pumps or compressors for the designed installation.	[SU1] Assessment of task fulfilment
	[K6_W06] has an organized knowledge on engineering methods and design tools allowing the conducting of projects within the construction and operation of ocean technology objects and systems	The student explains the processes occurring during the flow of liquid or gas through the pipeline system	[SW1] Assessment of factual knowledge
	[K6_W05] has an organized knowledge on design, construction and operation of ocean technology objects and systems	The student describes the elements of the pipeline system and the method of their assembly	[SW1] Assessment of factual knowledge

Subject contents	LECTURE Classification of pumps and pipeline installations. Energy balance of the pipeline installation. Characteristics of pipelines. Working conditions and pump characteristics. Vortex pumps, principle of operation, efficiency, high speed discriminant. Structural elements of centrifugal pumps. Cavitation. Application of centrifugal pumps. Positive displacement pumps, principle of operation, efficiency of positive displacement pumps and their application in a marine power plant. Compressor classification. Displacement compressors, work diagram, multi-stage compression. Vortex compressors - fans and blowers. EXERCISE Principles of calculating flow resistance. Rules for the selection of fittings. Calculations of selected installations in a marine engine room. Selection of pumps and compressors.
Prerequisites and co-requisites	Thermodynamics, Fluid mechanics

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Exercise	60.0%	50.0%
	Exam	60.0%	50.0%
