

Subject card

Subject name and code	Underwater Technology, PG_00045098						
Field of study	Ocean Engineering, Ocean Engineering						
Date of commencement of studies	October 2020	Academic year of realisation of subject			2022/2023		
Education level	first-cycle studies	Subject group					
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	6	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Theory and Ship Design -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Lech Rowiński					
	Teachers	dr hab. inż. Lech Rowiński					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	30	3.0		17.0		50
Subject objectives	Provide the student with basic knowledge regarding underwater technology and equipments utilized in oceanology, offshore industries, aquaculture, military activities and tourism. Provide the student with design methods specific to underwater technology.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_U05] can formulate a simple engineering task and its specification within the range of design, construction and operation of ocean technology objects and systems	Is able to define task regarding selection of a device for indicated functionality in given environment			[SU1] Assessment of task fulfilment		
	[K6_W08] has knowledge of the principles of sustainable development	Student knows environmental conditions under water surface and their influence on humans and on technical means used in underwater activity. Student understand influence of underwater activity on natural environment. He knows principal solutions utilized to overcome threat to humans equipments and environment.			[SW1] Assessment of factual knowledge		
Subject contents	Lecture: Features and parameters of the underwater environment; History of underwater technology; Man beneath the sea- diving and control of the system. Components of underwater systems and submersible; Critical materials and solutions used in underwater systems. Underwater tasks, tools and equipments; Work subsystem and components. Visualization of water space, navigation, communication, oceanological equipment, manipulators. Motion systems of submersibles; Power sources and power supply systems. Resistance of structures against marine environment-hydrostatic pressure, corrosion.						
Prerequisites and co-requisites	No requirements						
Assessment methods and criteria	Subject passing criteria	Passing threshold			Percentage of the final grade		
	Test on every lecture	60.0%			100.0%		

Recommended reading	Basic literature	<p>1. Allmendinger E.E.: "Submersible vehicle systems design";The Society of Naval Architects and Marine Engineers (SNAME),601Pavonia Avenue,Jersey City, NY07306, 1990.</p> <p>2.
